

Take action for your Environment Environmental issues in reunion Island

The traffic jam, that produce a lot of Greenhouse Gas.

Indeed in reunion island, the traffic car is very intense. And during the rush hours, road are full at the exit of the cities because people go to work or go back to their home after working and sometime jam lasts during hours and at the same time motors work and produce Greenhouse gas for hours and hours.

Wastes In the River that go in the sea and then fishes and turtles eat it.

Indeed people in reunion Island use to picnicking or camping next to rivers or at the beaches. And the most of the time after they left their place, they leave their wastes and when it rains, the rain bring all that rubbish to the sea where a lot of turtles and other marine animals are trapped with.
