7 responses

100% of teachers think that they have improved their digital competences thanks to the use of the TwinSpace and other digital tools.

What would you improve in this project?

7 responses

If the situation would be better, I would like to go to the beach to clean it. For me, is important visit one place relative to the project to complete it

Videoconferencing

This year was a problem to do more videoconferences with students the other European countries. So I would like improving this situation!!

Well, I am trying to think all day about sth to improve, I think I should engage parents more so they can make their children more responsible and careful on project tasks .

Nothing, I

It has been a great project, maybe, for future eTwinning projects, I would programme more interactive activities for students.

As improvement proposal for future projects, teachers would programme more videoconferences among students, engage parents more, they would take students to the beach to do cleaning tasks and they would programme more interactive activities for students.
