

Composition about similarities and differences

THE SECRET DIARY OF ADRIAN MOLE AGED 13 and $\frac{3}{4}$

Recently I've read a book about Adrian and I also watched the movie, which I liked very much.

I found out that Adrian and I have a few things in common.

Comparing our appearance, we both wear glasses. We sometimes get spots and we both are still in school learning. What is more, we help elderly, ageing people as much as we can. Just like me, Adrian likes to take some time and think.

I think that similarities aren't always supposed to be good, positive – we are similar even in the saddest moments of our lives. On 1st December my dog ran away, just like Adrian's. I wish I would have taken more action, but maybe it was fate, maybe it was supposed to happen. At least I know that I am not the only one, that some people have it WAY worse.

On the other hand, the more I think about Adrian, the more different we are. Adrian's hair is dark brown, I have dark hair with blond strands. His parents have a complicated relationship, I am glad my parents don't. Adrian had a crush, but I didn't. He is a boy and I am a girl. His best friend is a boy!

I could go on comparing us, but it would take much more time. I think, I have said the main things.

In conclusion, I recommend reading this story, especially to teenagers. You will enjoy the book, it is written in a diary form.
