

## “The Secret Diary of Adrian Mole”

I read a book “The Secret Diary of Adrian Mole” written by Sue Townsend. The book is about the life of adolescent Adrian.

His life was unusual because his mother slept with another guy and his dad drank a lot of alcohol, and he had a girlfriend that is not typical of some teenagers, some may be weird.

Adrian was curious about what was uncharacteristic of me. He helped an old sick man Ben Baxter handling up a house - that I haven't done yet.

Adrian rebelled against school wearing red socks which I also wouldn't do and wouldn't want to do.

The boy grew up with acne and I haven't.

I have a lot of differences with Adrian, in naming and naming them.

I also have a lot of similarities in that I'm a boy, I've experienced bullying, I had got angry with my friend, and I have friends who support me in trouble like Adrian had. I have an angry teacher who is angry with me and my friends.

I really enjoyed reading the book because it tells me that everyone is going through a period of time called adolescence.

There are a lot of difficulties in this age that need to be overcome and I don't think you need to panic right away - you need to take this as a serious matter and resolve it calmly.
