

The image features a background of stylized rain falling diagonally from the top-left to the bottom-right. The rain is represented by thin black lines and teardrop-shaped droplets. The background is a light blue color with horizontal white stripes. In the center, there is a white rectangular box with a black border containing the text "Drop by drop....".

Drop by drop....

Have
a
bath!

Take a
shower!

Wash
my
hands!

Well, we
don't
have a
problem,
do we?

Every house, every single day!

In our
region we have
plenty of water, so
why should I care?

A crowd of people is shown in silhouette against a light purple background. The person in the foreground on the left has a speech bubble above their head. The speech bubble contains the text: "Maybe someone else should do something...".

Maybe
someone else
should do
something...

Let's see. What the situation is...

To the dreams...

What's
going on
here?

Hey!
What's
happening? Why
is everyone
yelling?

Unfortunately,
water scarcity
began. We will
now be able to get
a limited amount
of water per day.

It's very sad!

Yes it's...

Please everybody line up! By showing your IDs, you can only get 10 liters of water today.

This is not enough for all our needs!!

Just 10 liters??

We
have to be
very careful and
prudent.

How are we going
to spend the
whole day with
only 10 liters of
water? Water is
needed for
everything!!

I shouldn't
use the siphon,
that wastes a lot
of water.

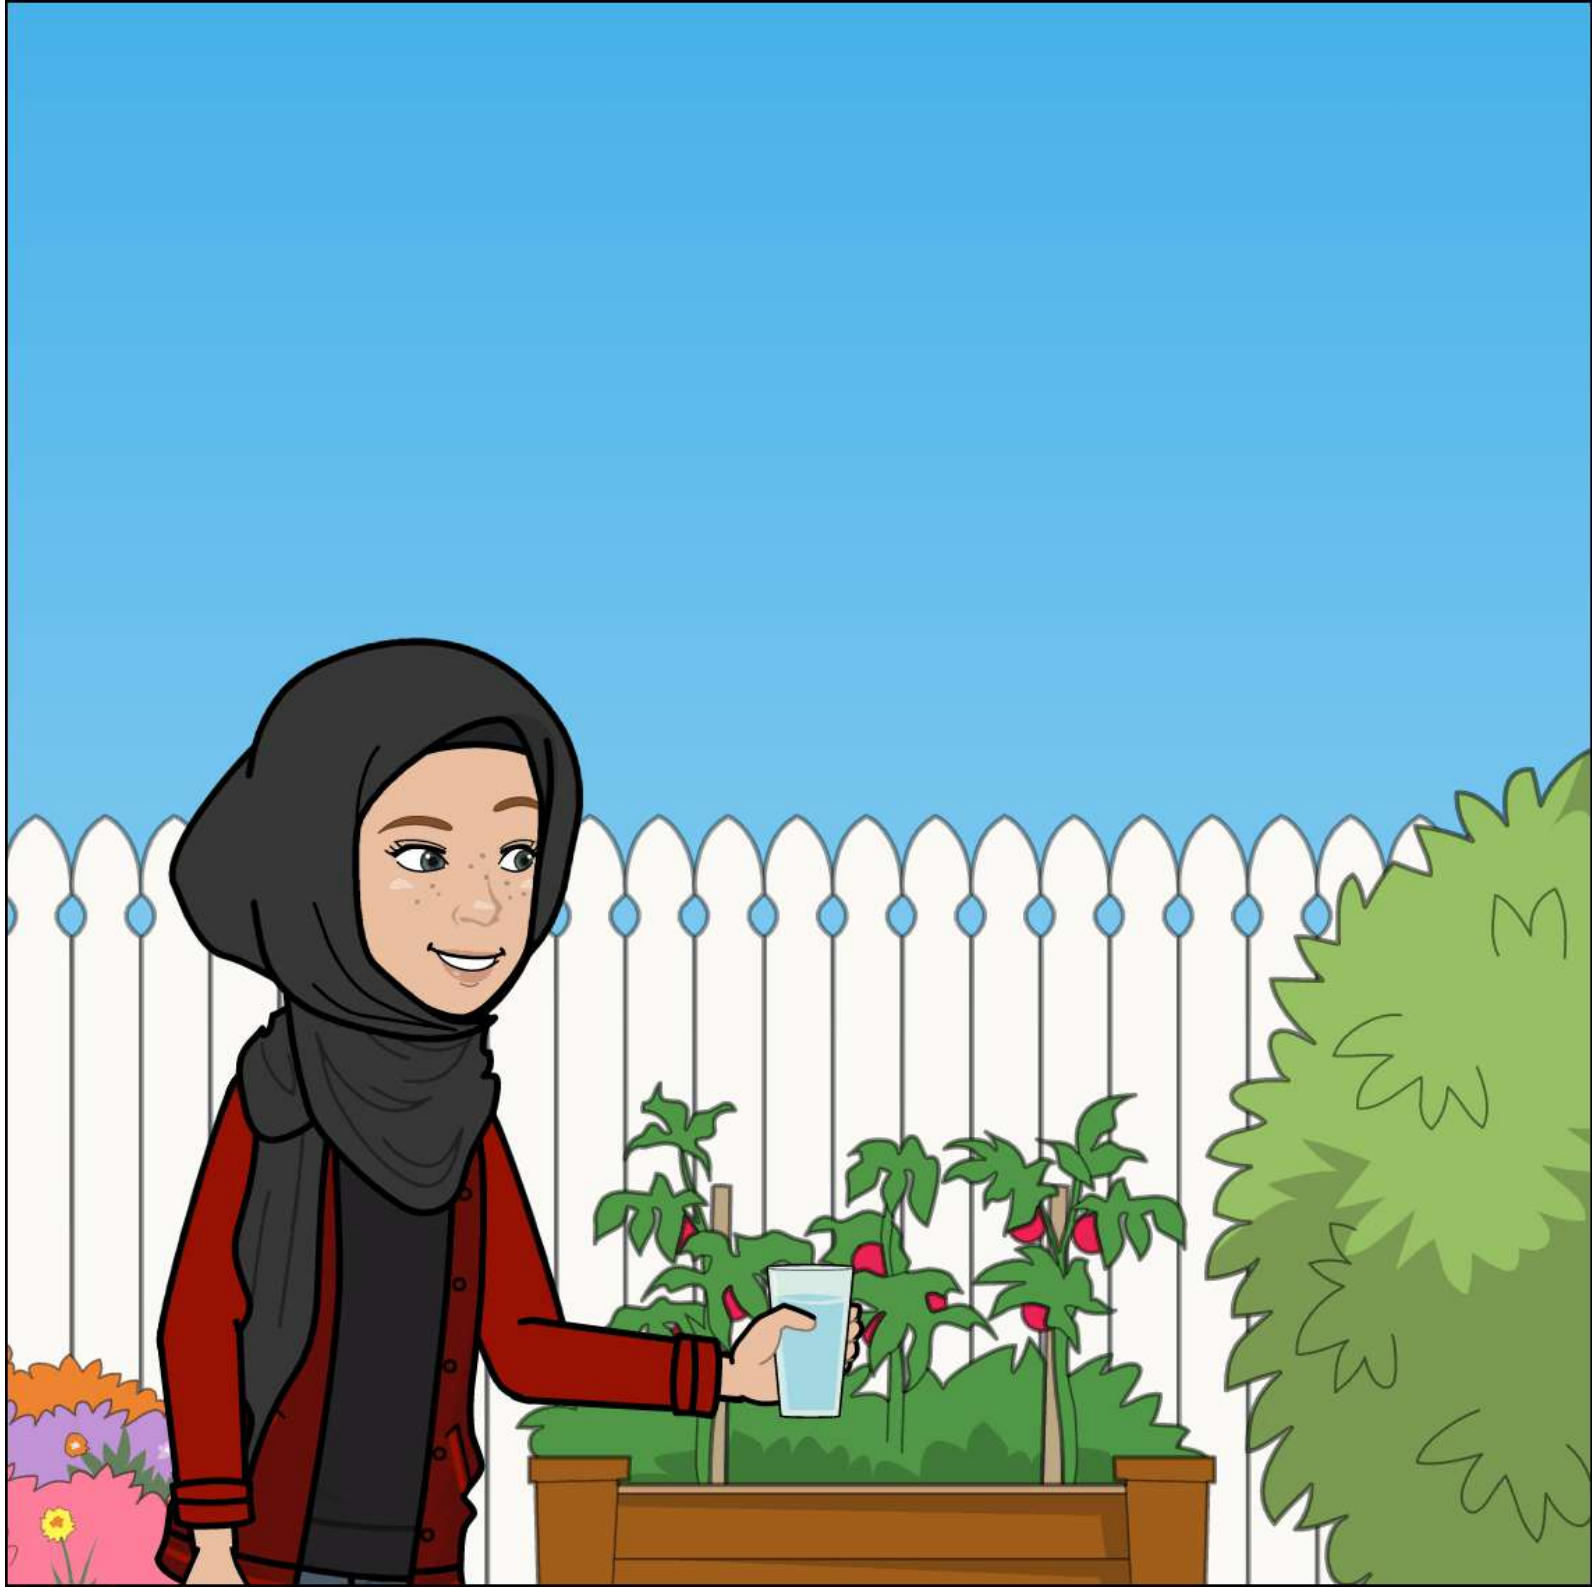

I can't
be! I spilled a lot
of water. I have to
use it properly.

In order
to cook, I have to
wash the vegetables.
But I must not waste
the water.

After washing
the vegetables, I can
water the flowers with
the water I use.

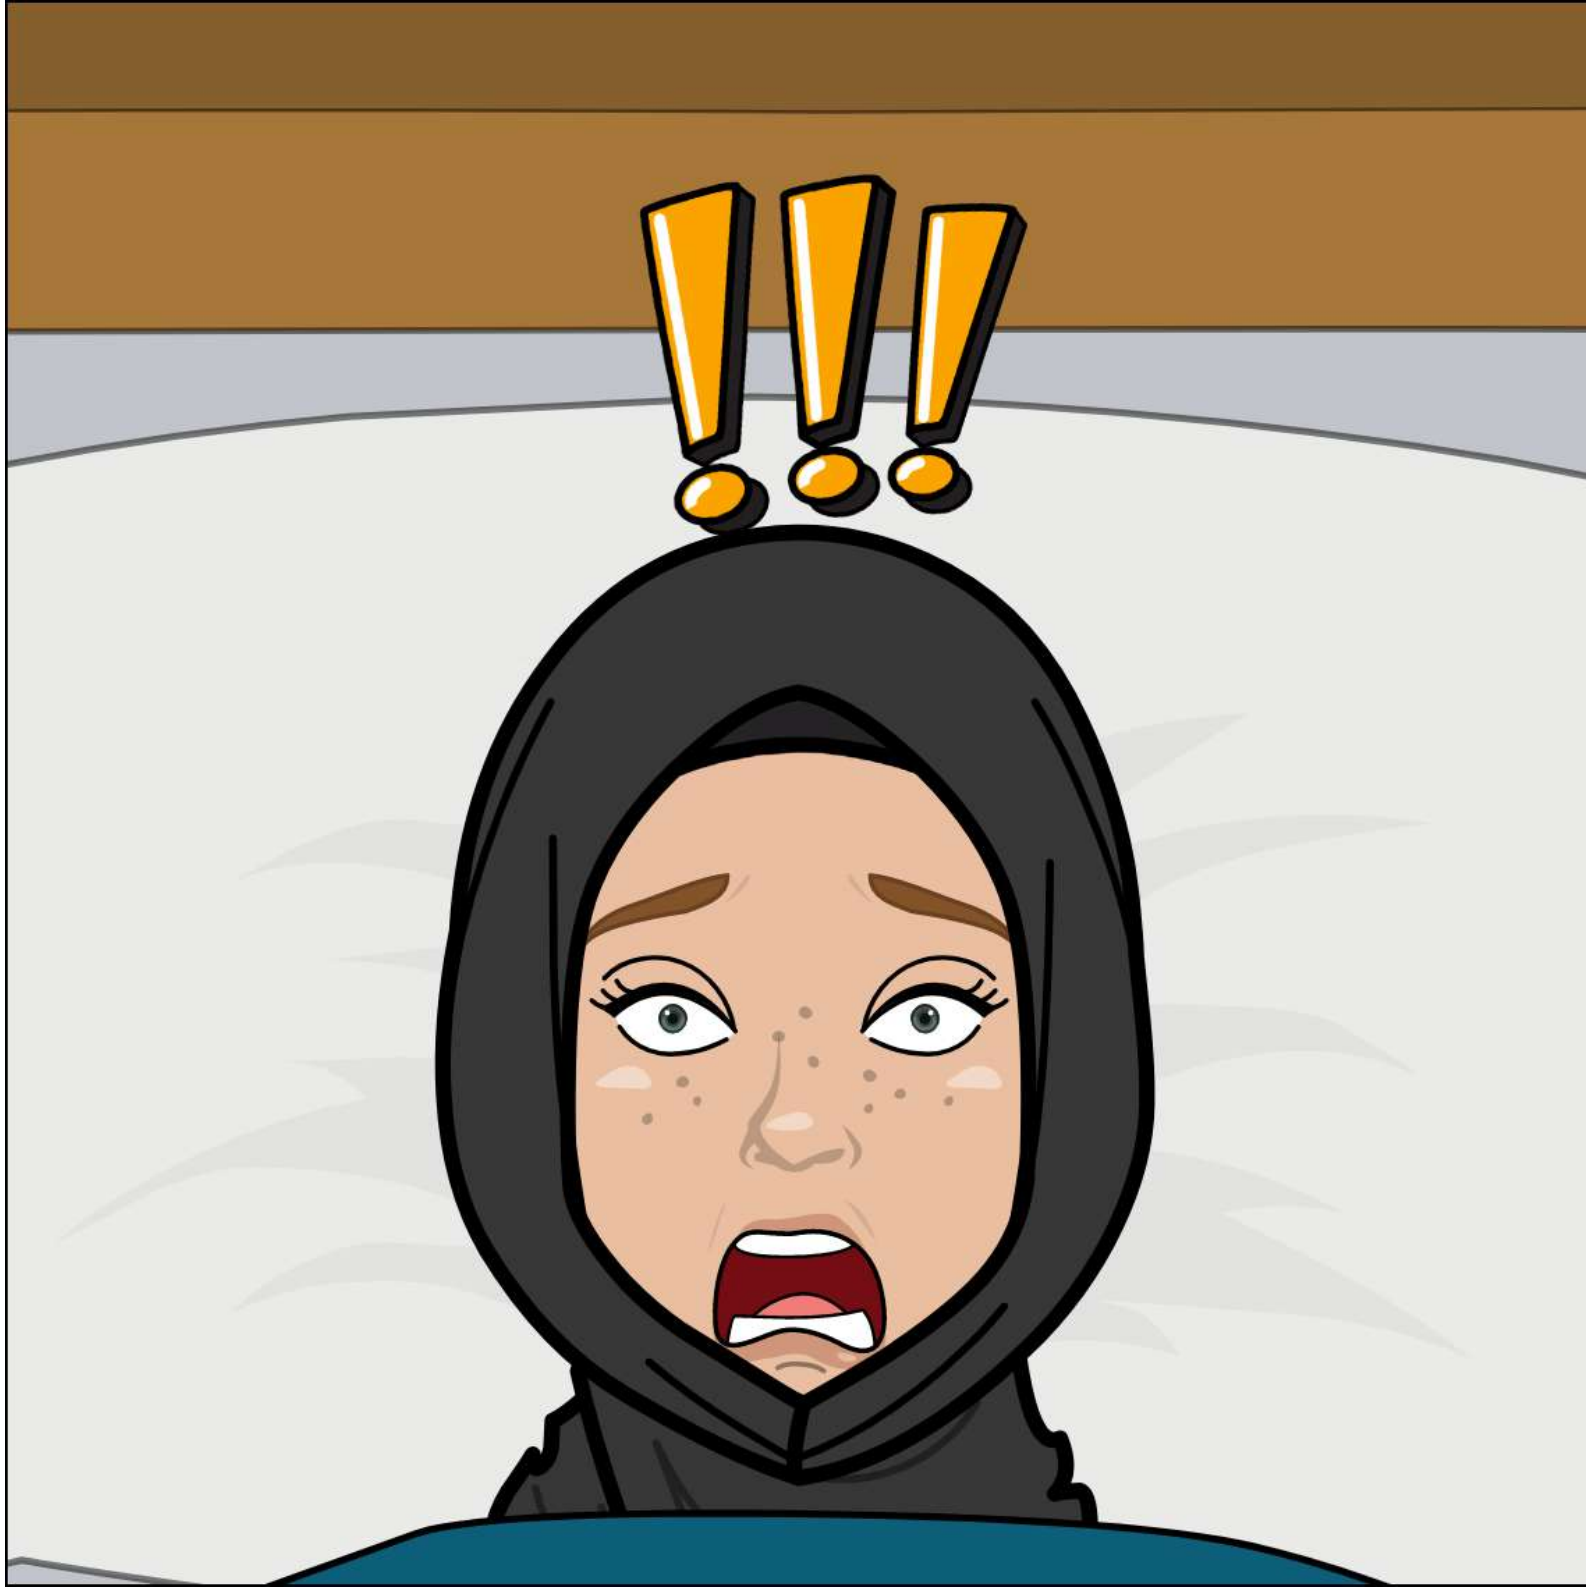

A noise rises...

How
hard it is to
live with limited
water.

NO!
This was my
last remaining
water. NOOOO!!

Fortunately
it was all a dream.
It can also be called
a nightmare.

But if
we don't start
doing something now,
it won't be just a
dream...

You! Yes
you! Please get up
and say stop to this
huge waste of
water.

If we
are together we
can achieve
anything!!

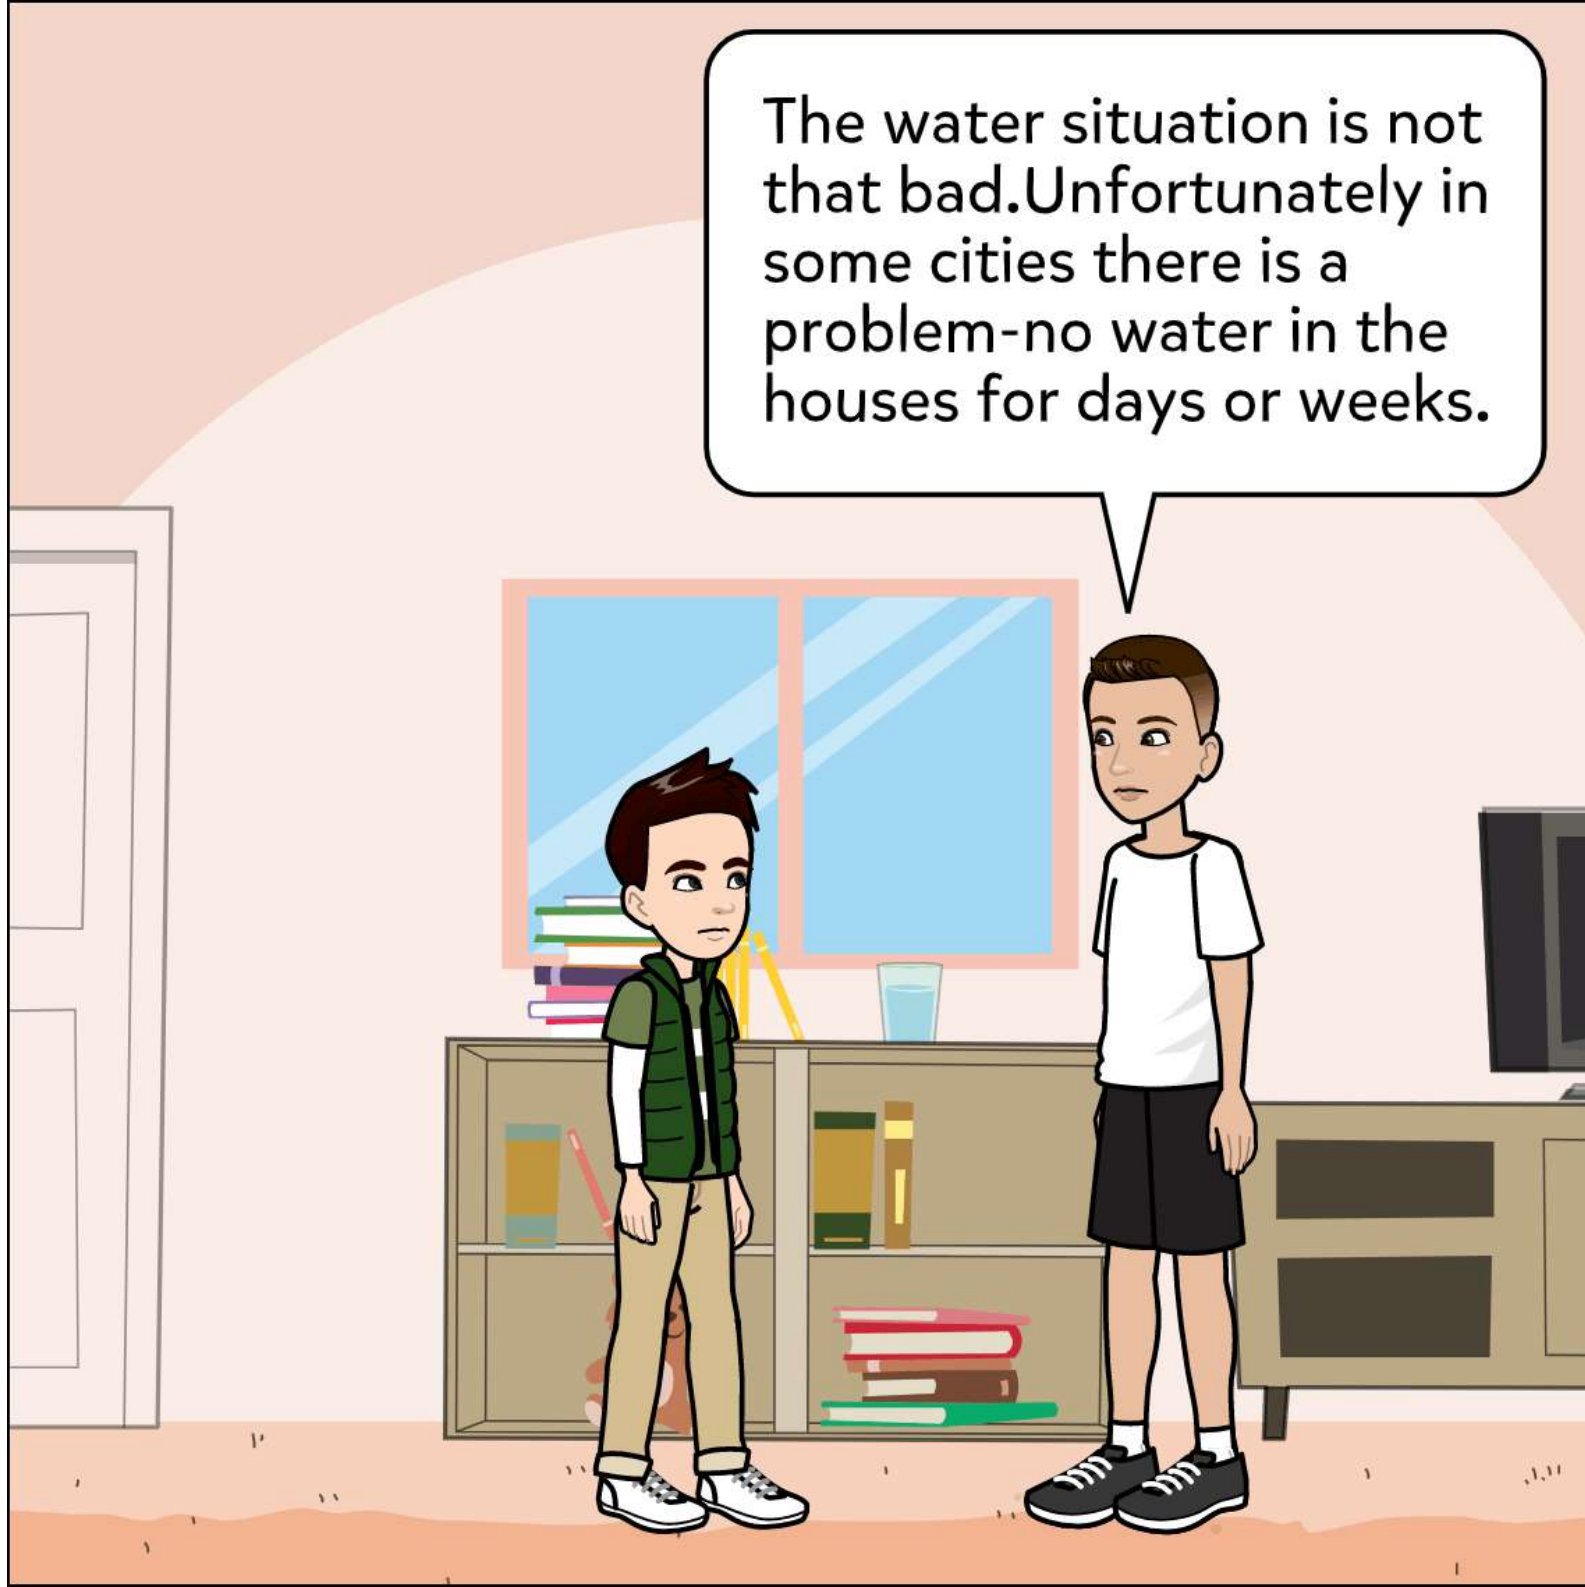

Meanwhile in another part of
the world..

How
is the water
situation in
Romania?

At home talking my best friend from Malta...

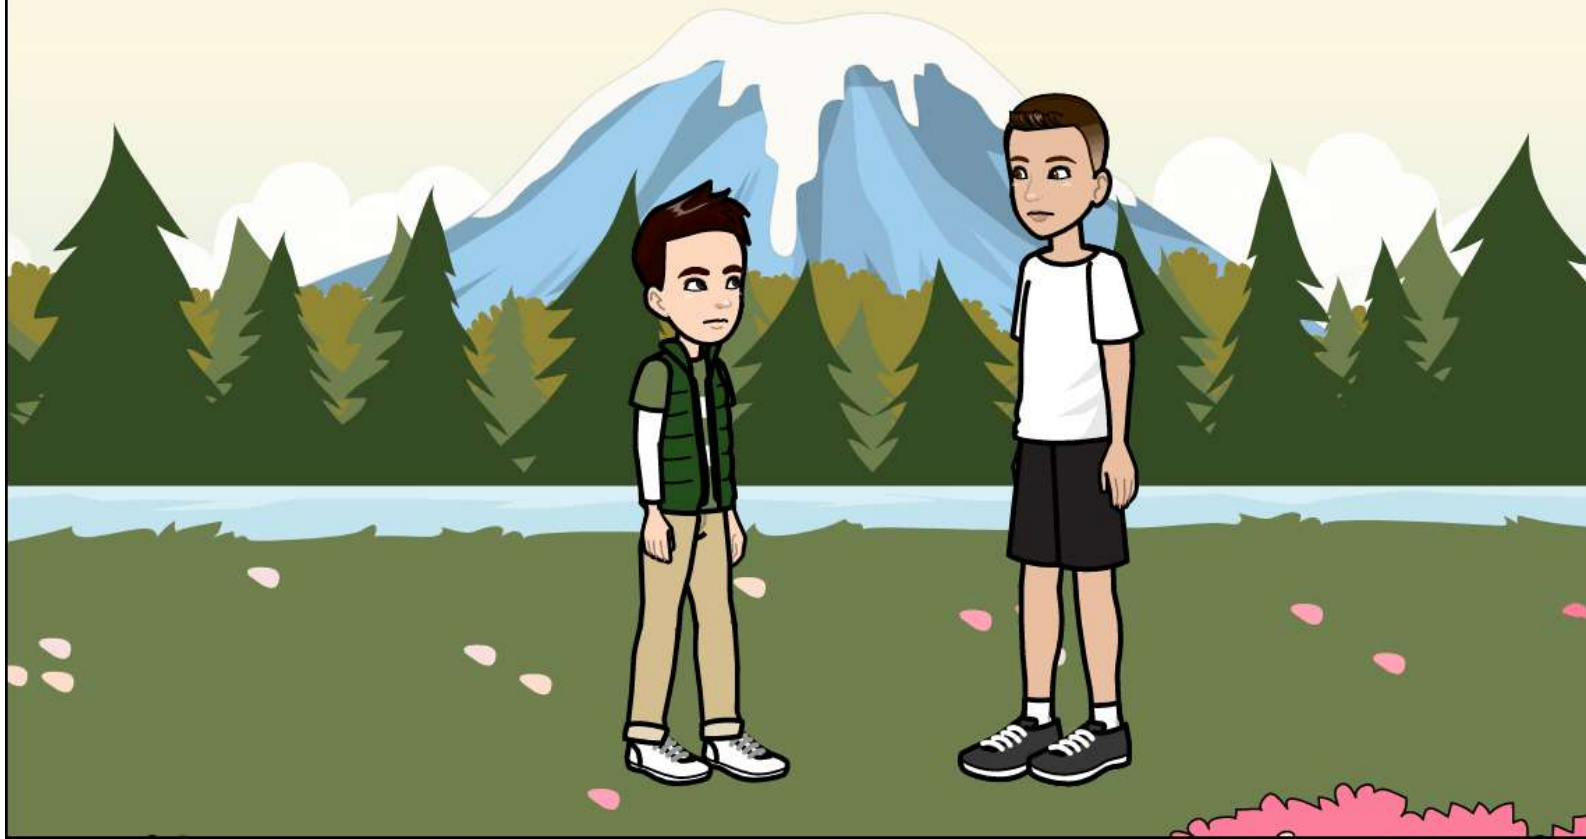

The water situation is not that bad. Unfortunately in some cities there is a problem-no water in the houses for days or weeks.

Oh. That's sad. We also have this problem!

This happens usually
in summer. We have
a lot of lakes and
rivers but some of
them are polluted.

We
shouldn't throw
garbage around
lakes and rivers!

That's
right and we
should be careful how
much water we use
at home.

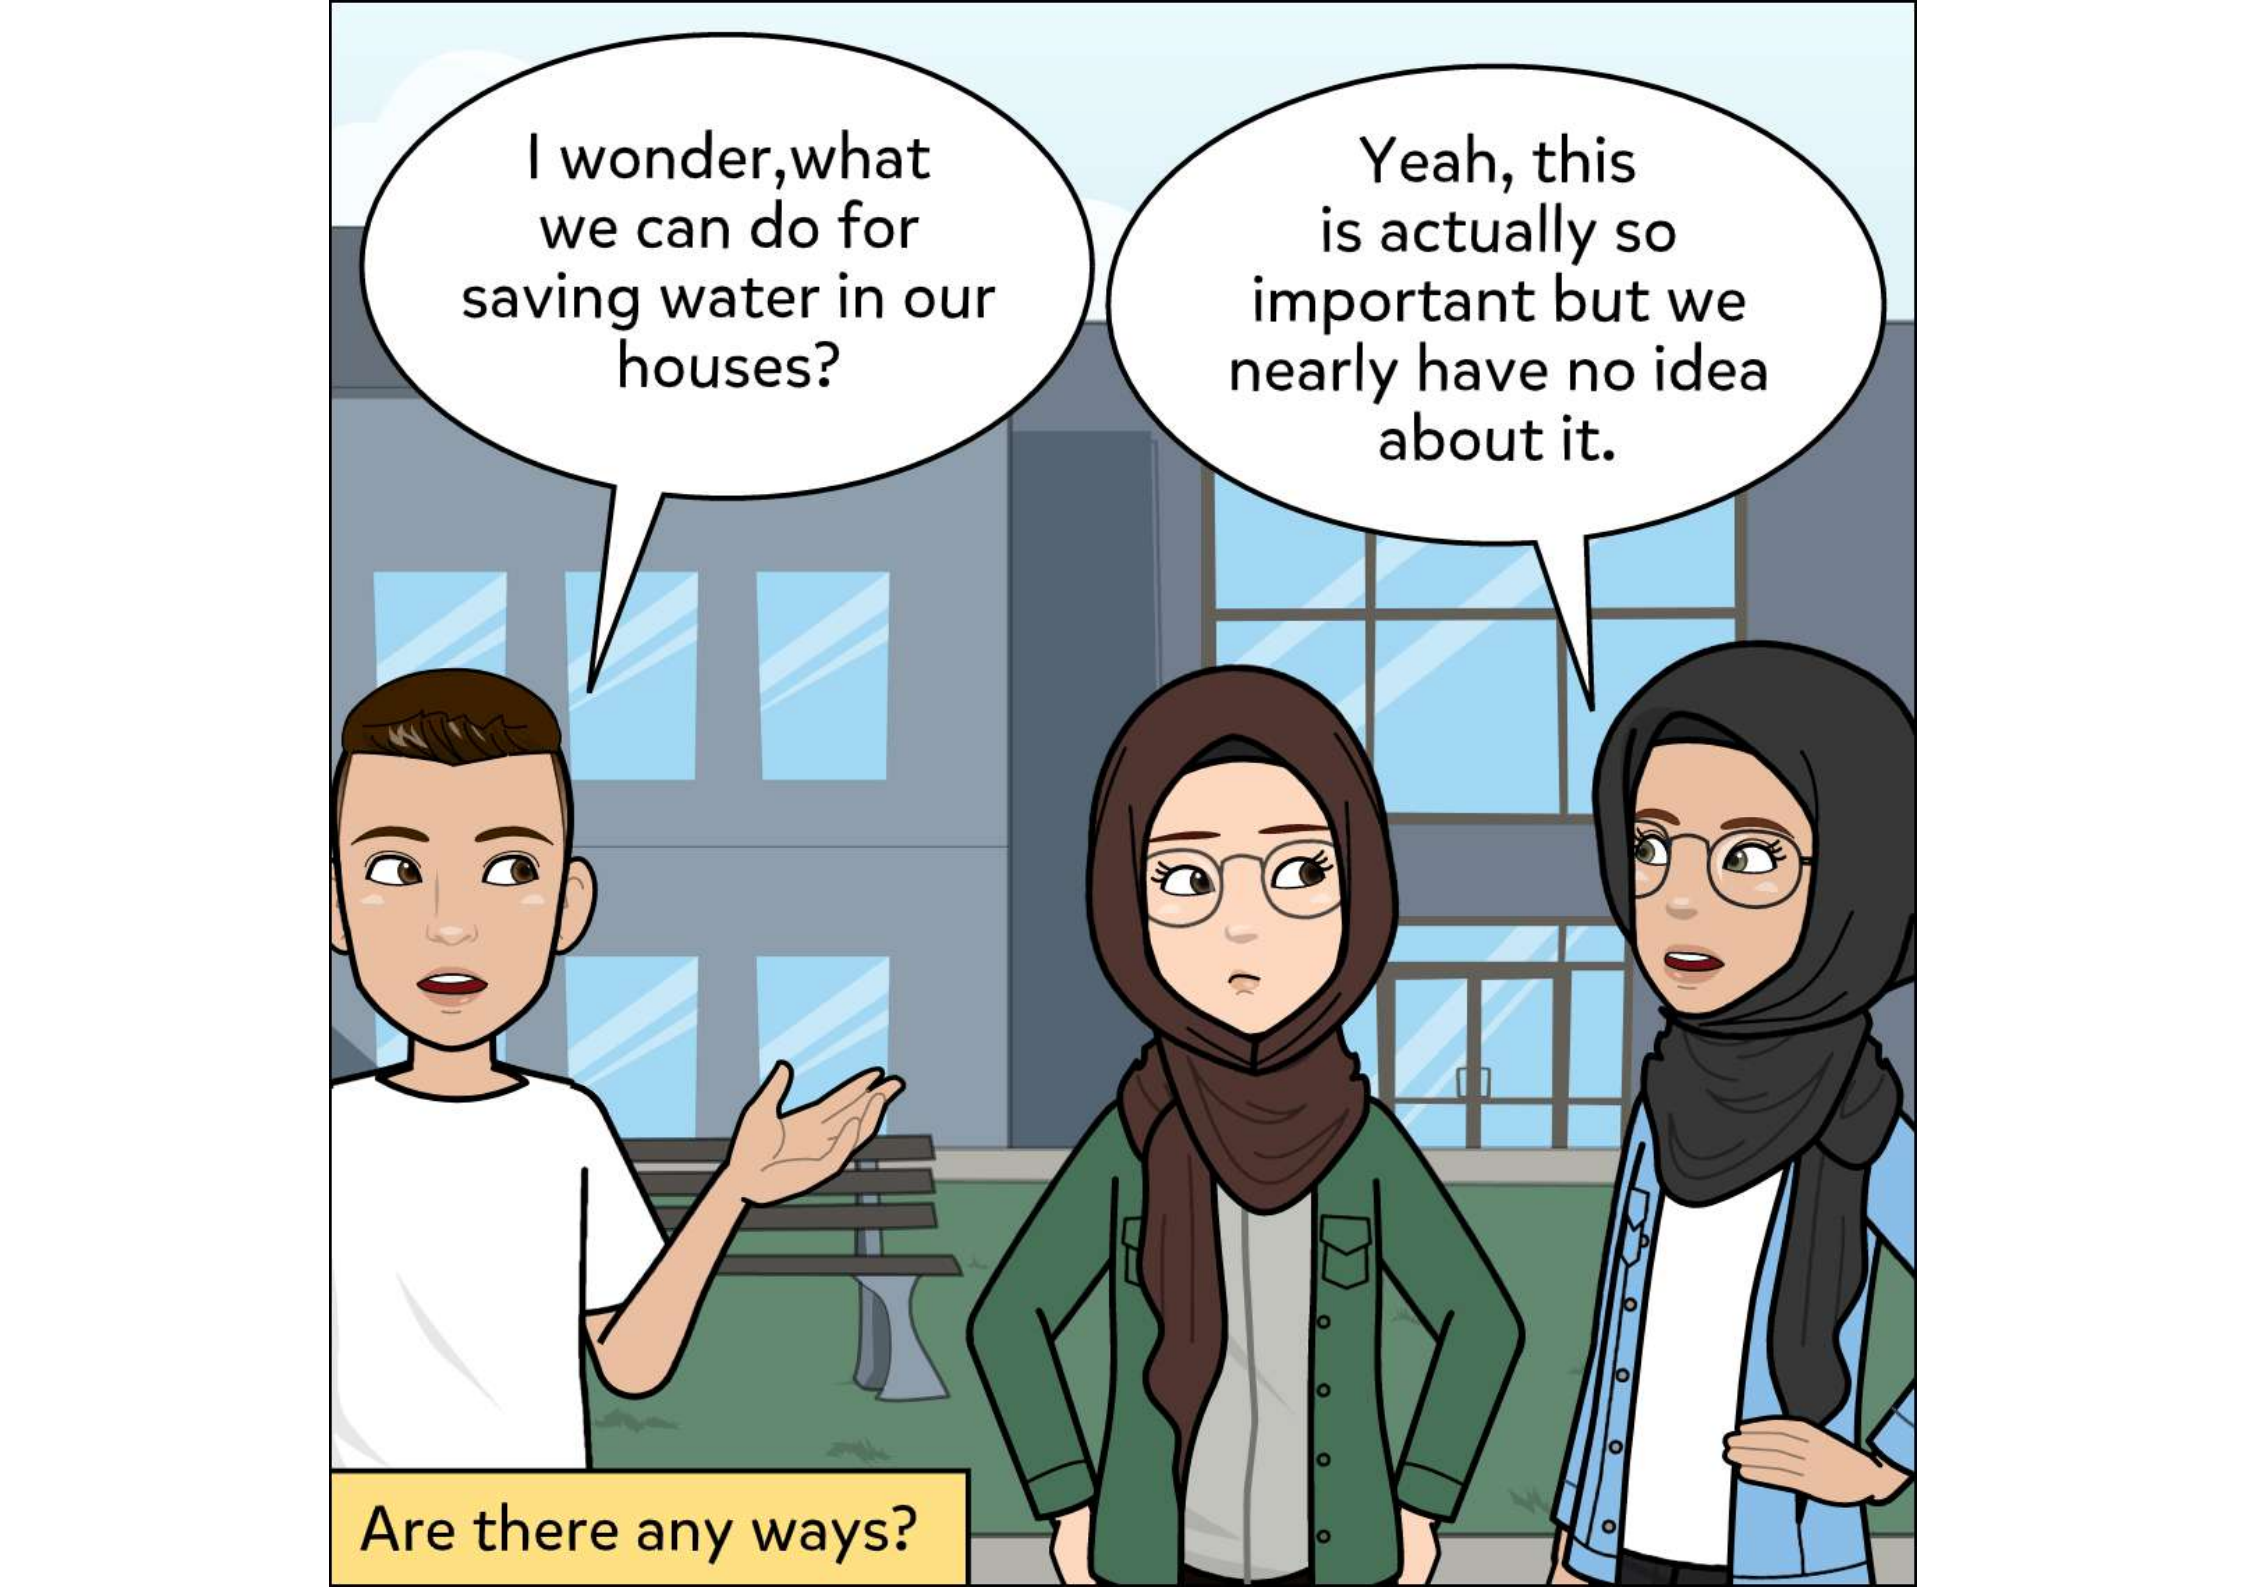

Every drop counts! Everyone can help to reduce water waste and pollution.

We
all should
take care of
water!

Let's
do it!

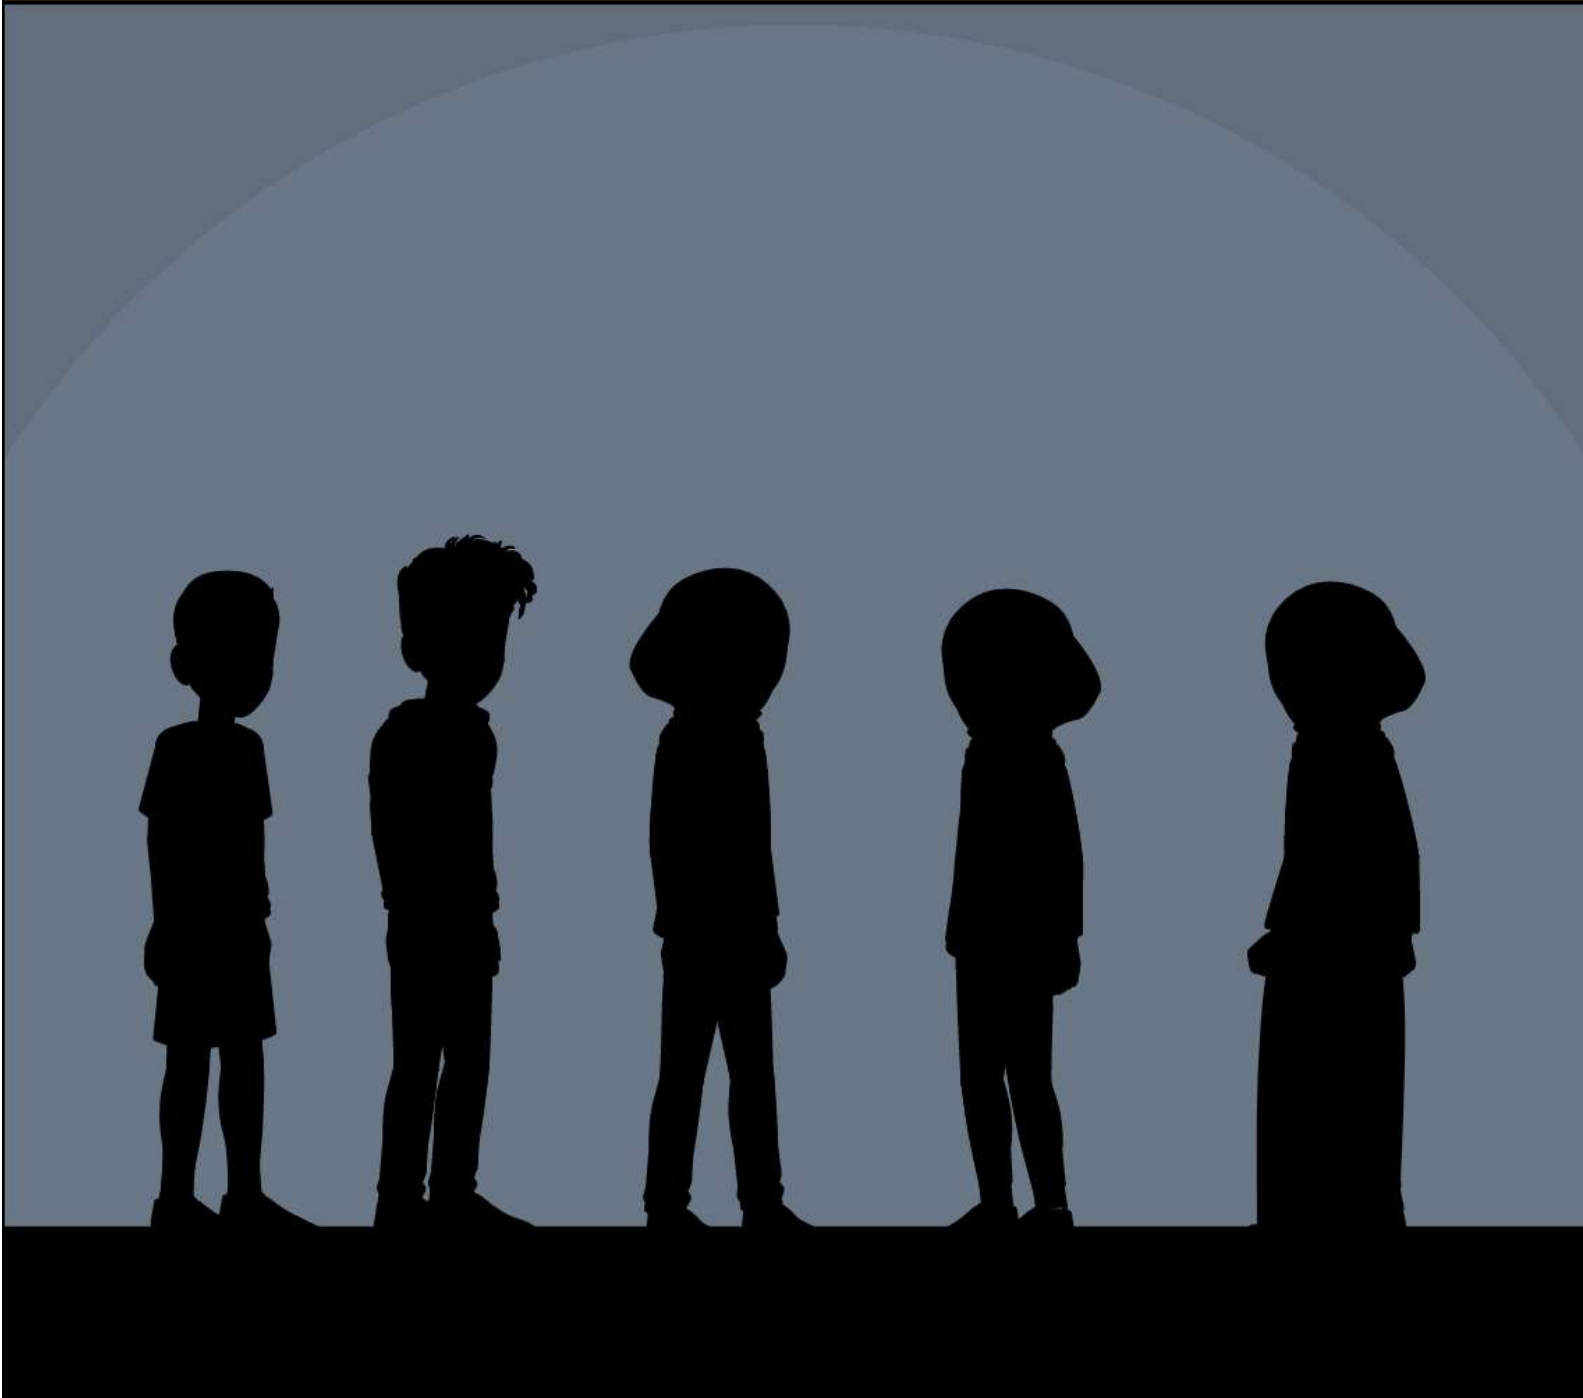

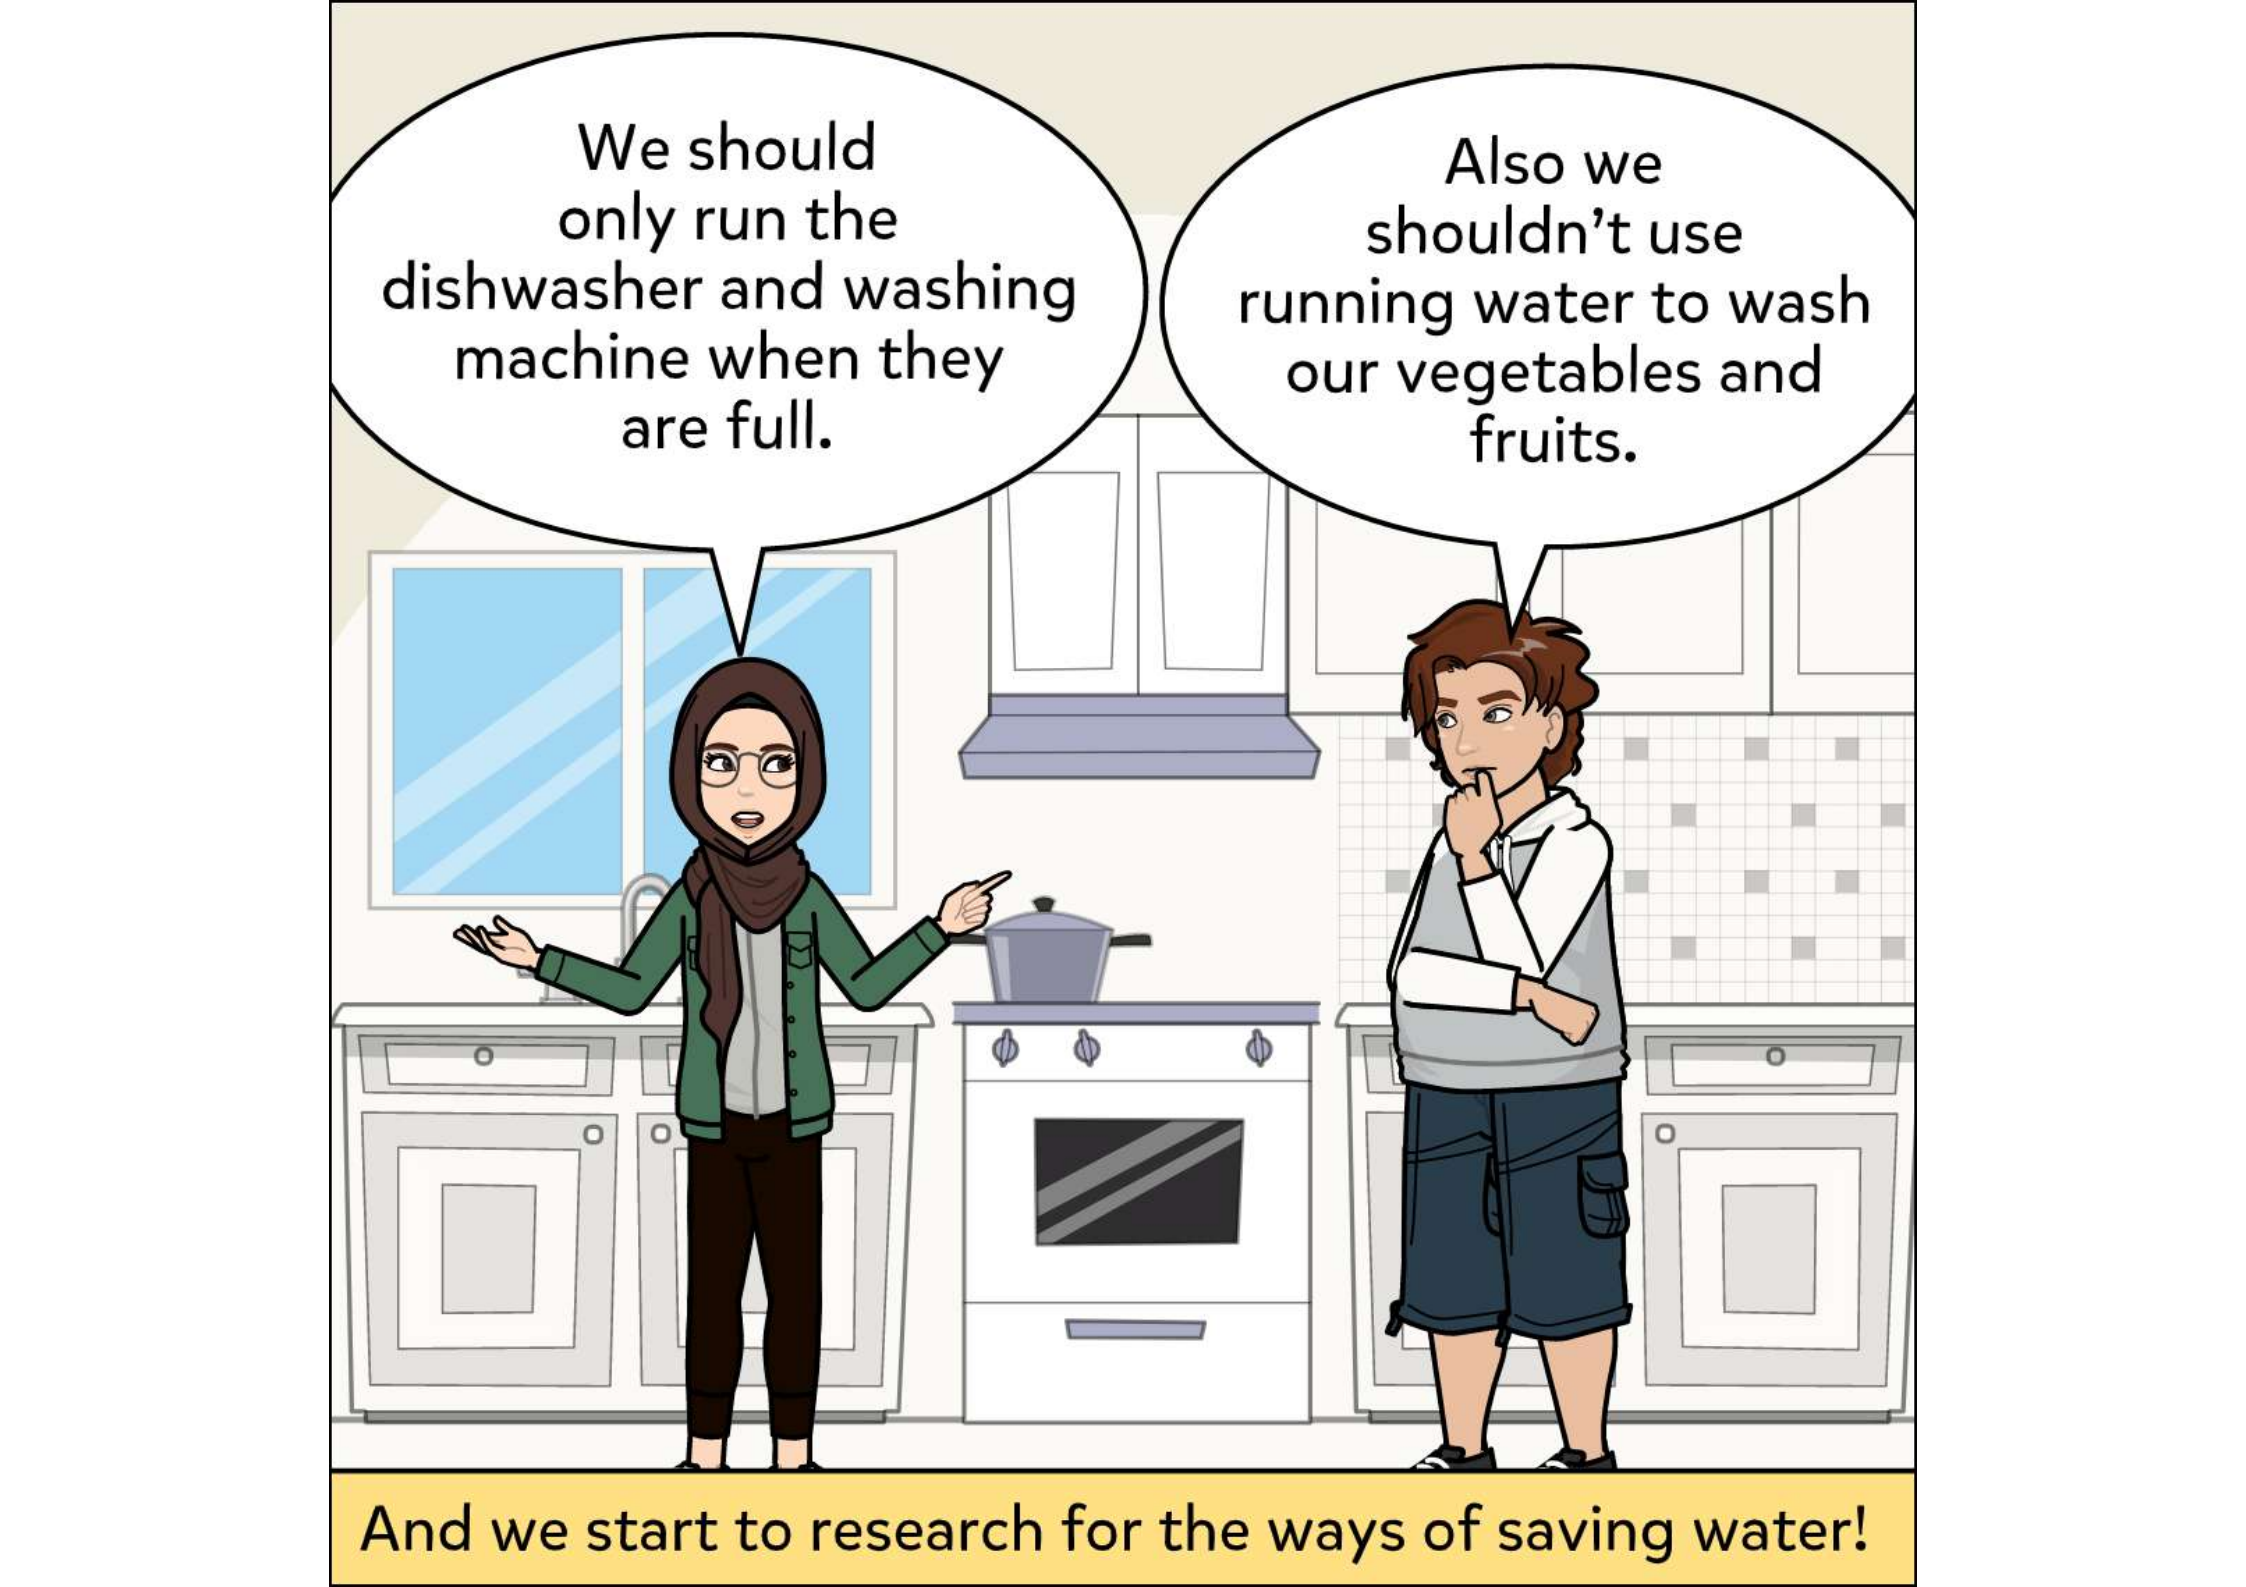

I wonder, what we can do for saving water in our houses?

Yeah, this is actually so important but we nearly have no idea about it.

Are there any ways?

We spend most of our time in our houses. And in this duration we cannot notice how much water we waste!

We should only run the dishwasher and washing machine when they are full.

Also we shouldn't use running water to wash our vegetables and fruits.

And we start to research for the ways of saving water!

We ought to use a good bar of soap instead of shower gels for bathing. Gels require extra water to rinse off.

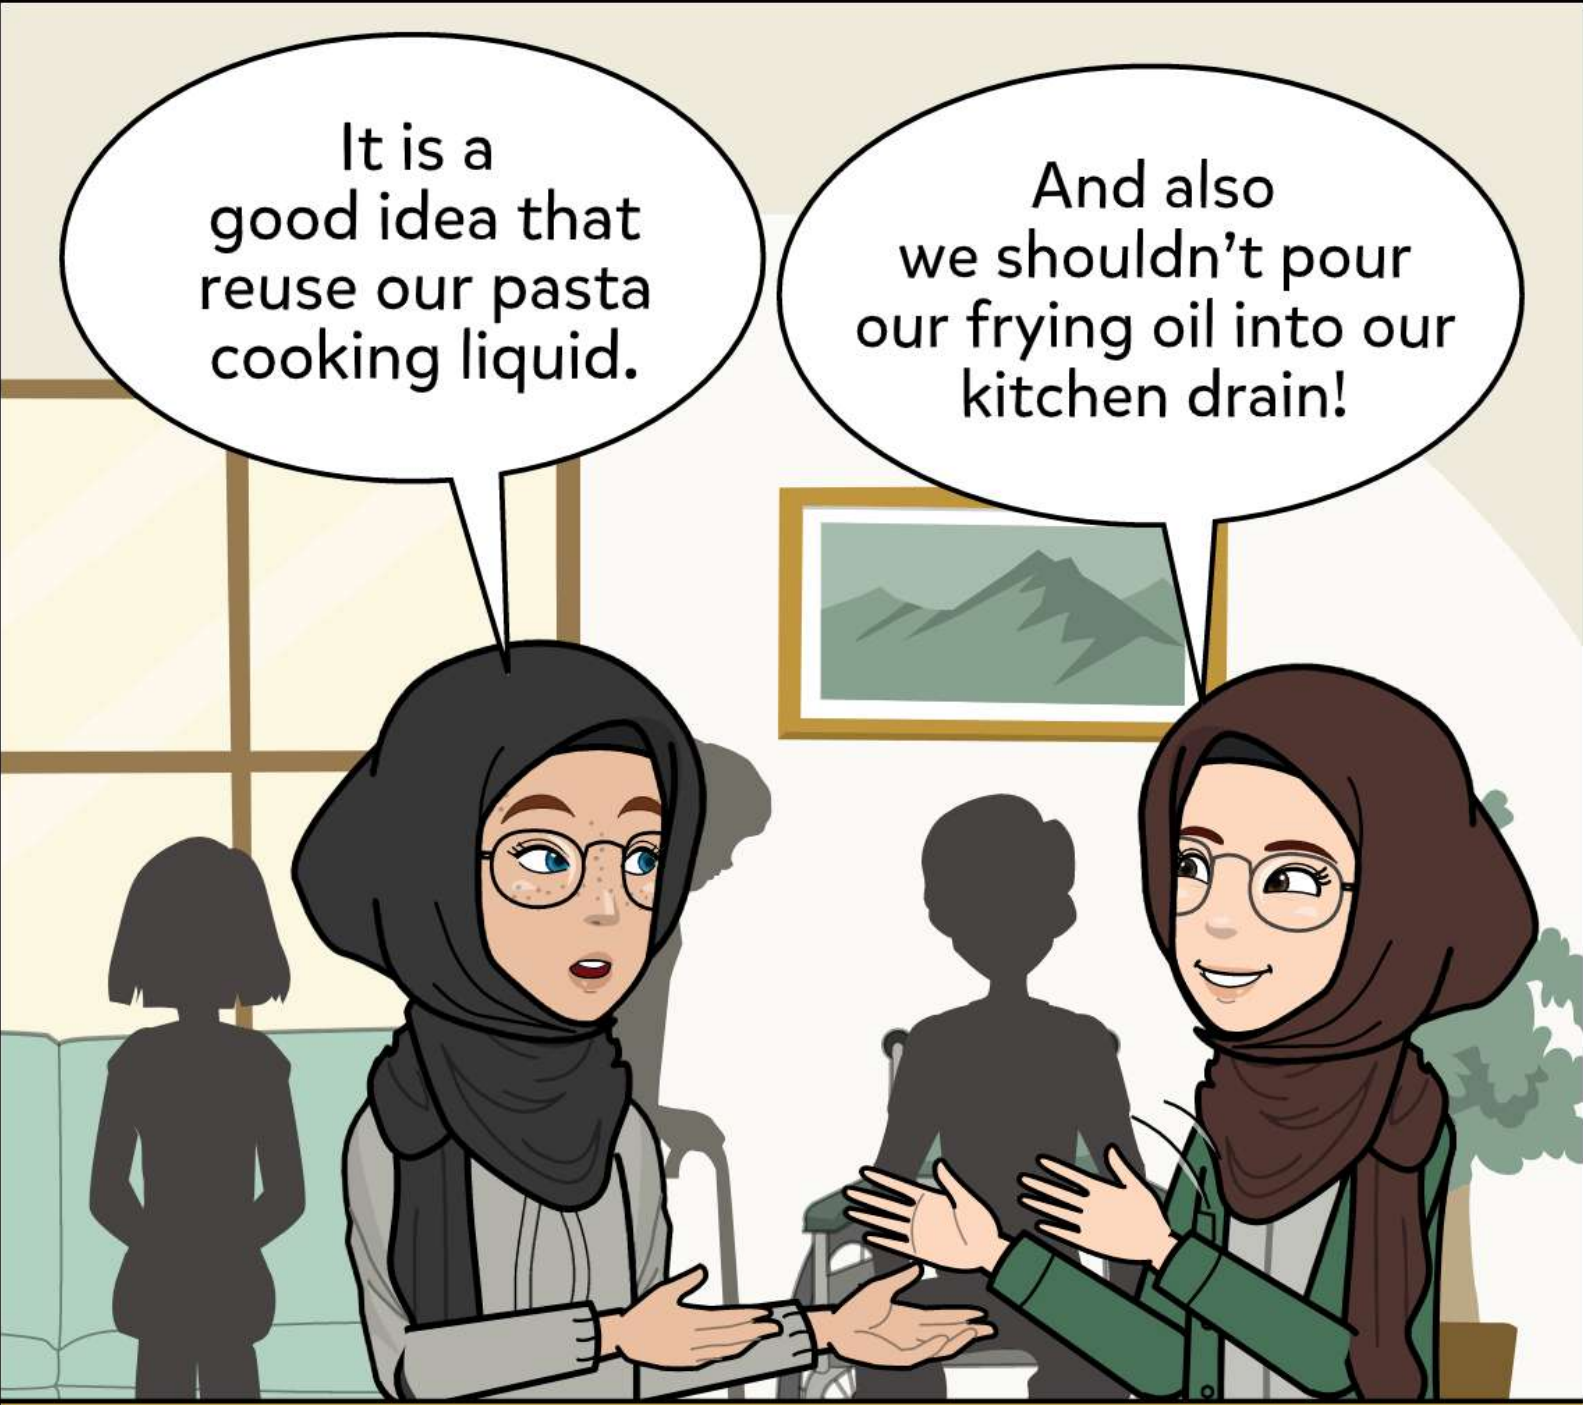

We should check our faucets and showerheads for leaks!

We ought to use broom instead of a hose to clean patios and driveways, and save water every time!

How about sharing this idea with our neighbors?

It is a good idea that reuse our pasta cooking liquid.

And also we shouldn't pour our frying oil into our kitchen drain!

While we are searching, in somewhere of the world water is being spent drop by drop...

People
again use
water
carelessly.

Approximately
13 thousand liters of
water is wasted in
1 year.

Did you know that trees consume about 300 liters of water in 1 year?

Trees
are the
world's oxygen
source

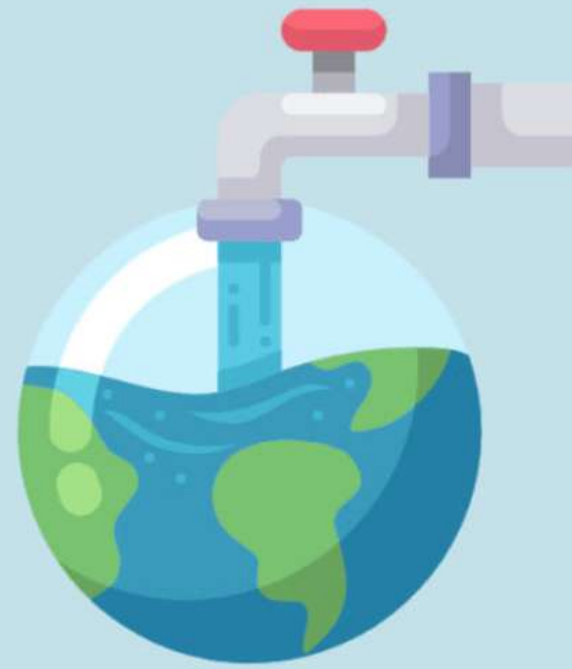

Also, trees prevent global warming which is the biggest cause of water shortage.

SAVING WATER!

How
can we save
water?

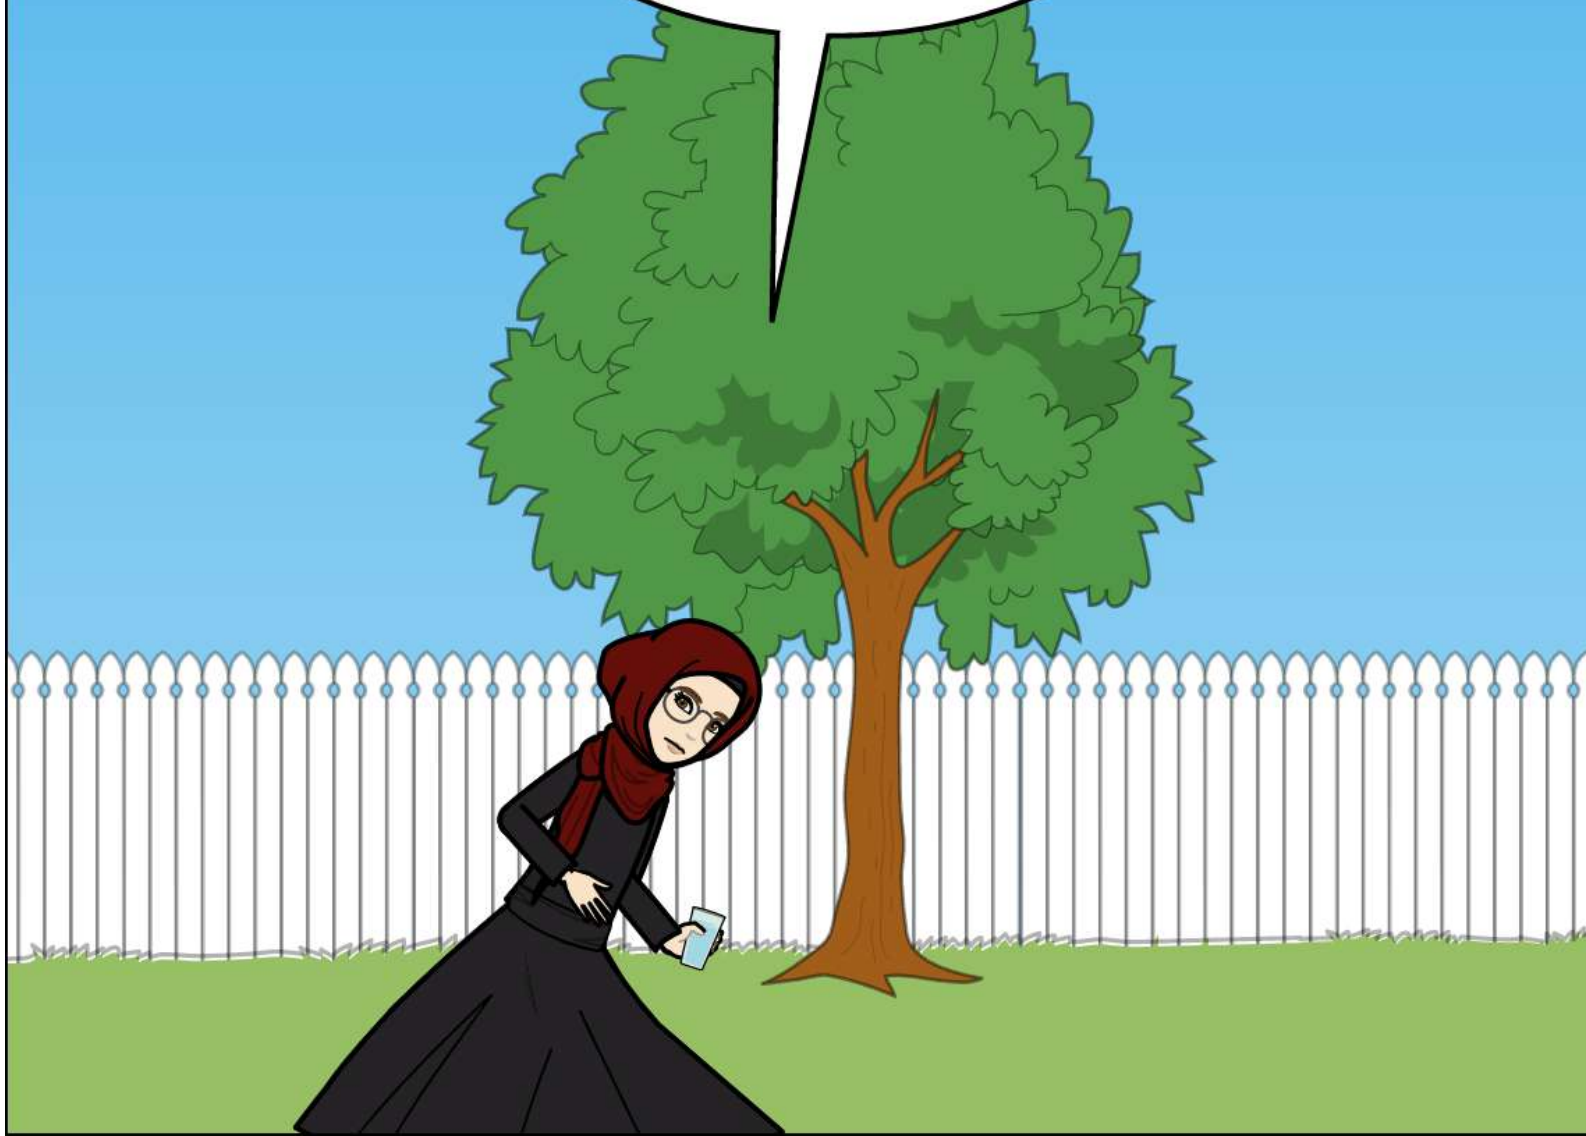

Don't
keep taps
open to water
saving.

Don't
pollute the
water by throwing
your garbage.

Many trees
can arouse with
the water we waste
every year.

Don't forget! If we protect the waters, we protect the trees. We can prevent global warming by protecting trees.

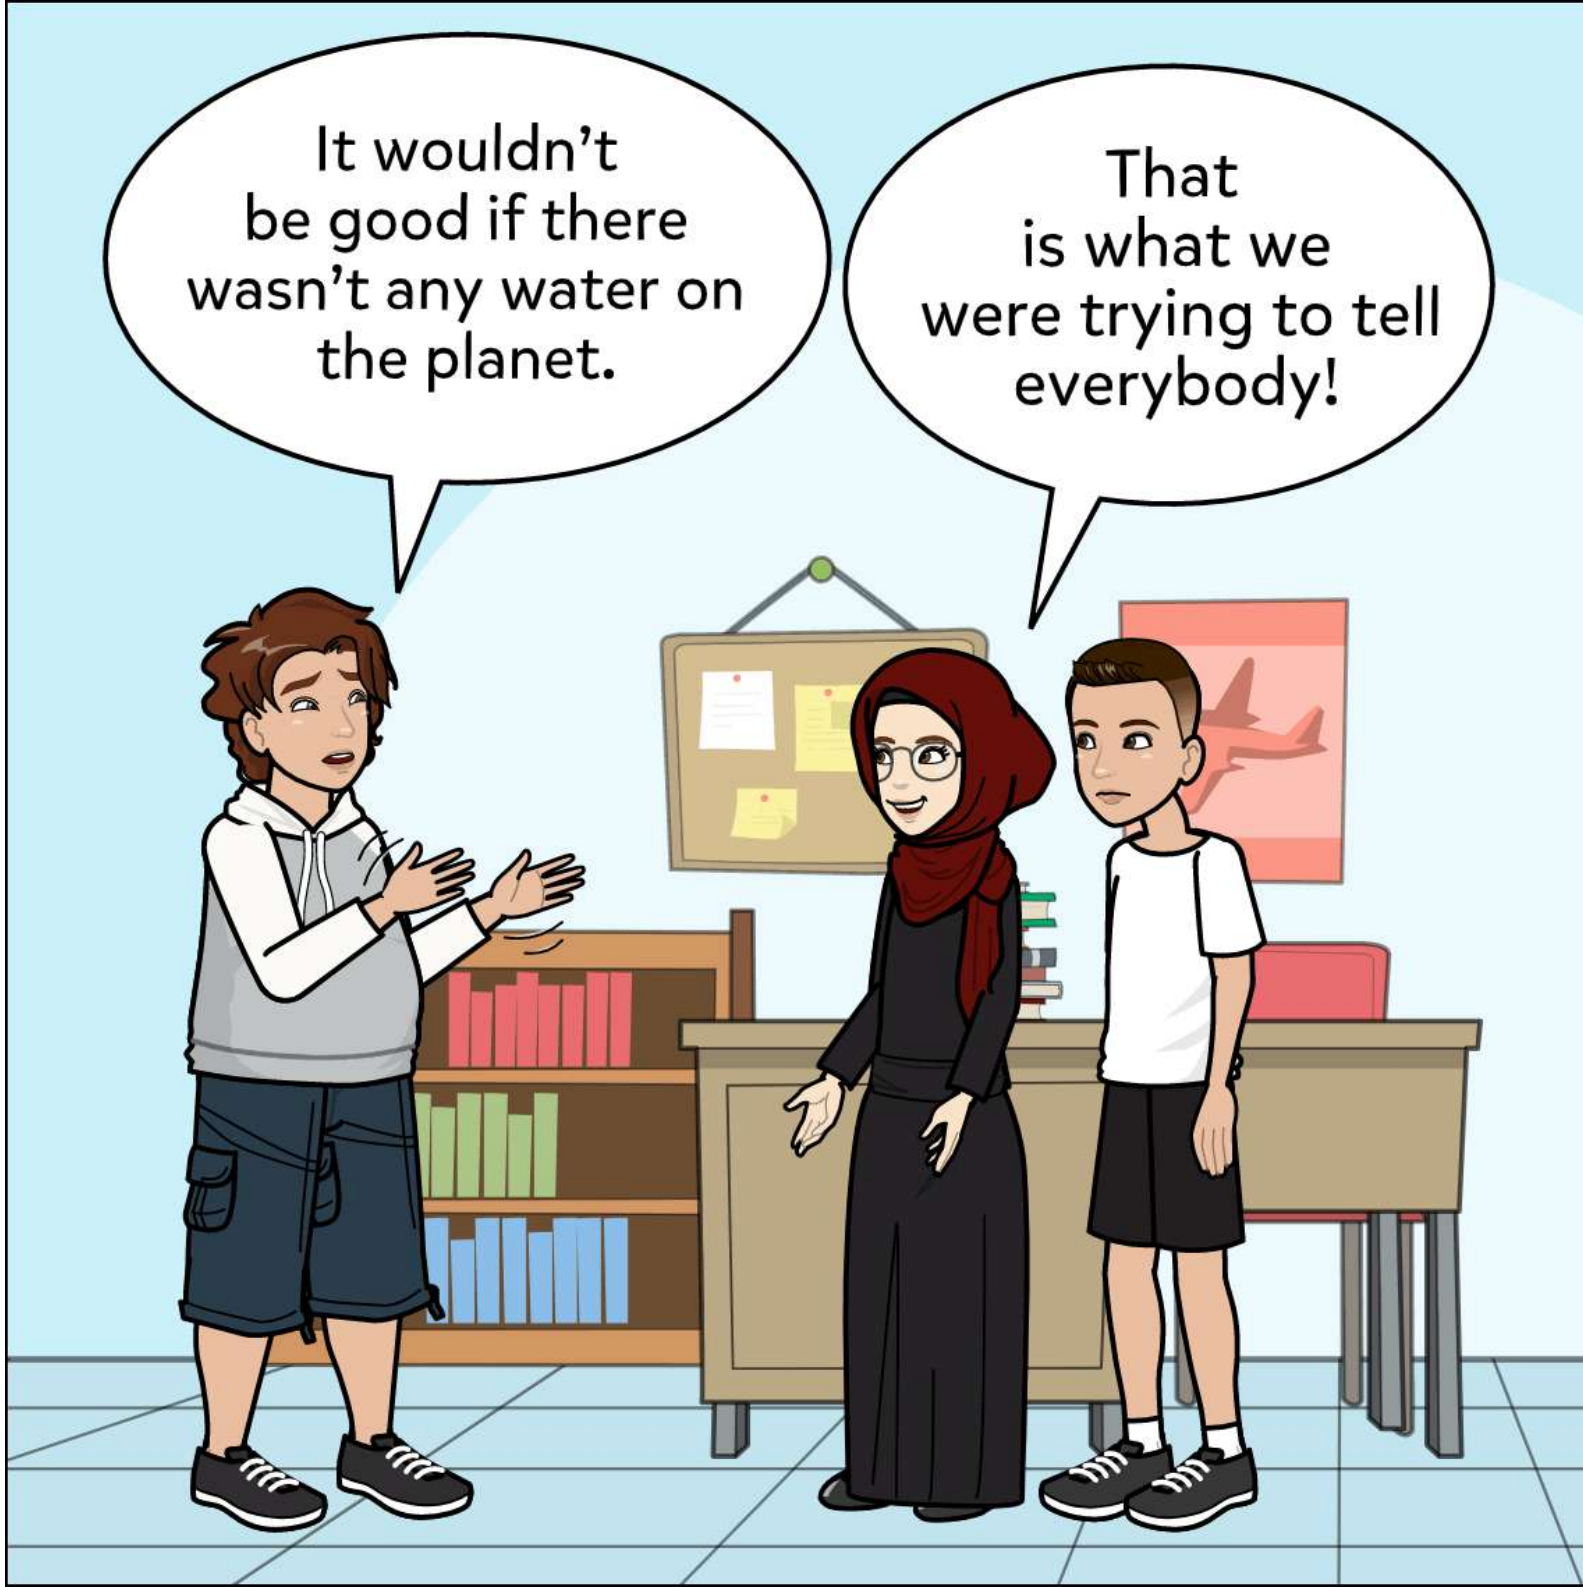

All
the things
you've mentioned
are so interesting!

It wouldn't
be good if there
wasn't any water on
the planet.

That
is what we
were trying to tell
everybody!

We should do something! Like some of the things we've talked about.

Yeah, you're right!

I've heard there is an app that shows you how much water it is used used. It's called HO2 tracker.

Really?!
I should
download it!

Yeah
me too!

Let's do it!

Yeah let's do it!

We should tell other people how bad water shortage really is!

Don't forget, every drop counts! You can make it count! Monitor the water usage in your home, turn off the tap, and use water wisely. Tell your friends to do the same!
