

SYMBOLISM OF WATER

BY MARTIN STOYANOV, HRISKO DINCHEV AND RADOSLAV KIOSEV

Water

- The mystery of creation
- Purification and cleansing
- Redemption and rebirth (e.g. baptism)
- The unconscious
- Rivers: the flow of time, journeys
- Lakes: the unconscious ("what lies beneath")
- Sea/Ocean: the mother of all life, spiritual mystery and infinity, timelessness and eternity, cycles (the tides)

What is water to Earth?

- Water is simple, and some of the most simple things in the world are the most important. Hardly a thing can survive without water. Humans definitely can't live without water. Since water is so important to life itself it is bound to have a lot of symbolic meanings.

IMPORTANCE OF WATER

- Water is so important to everyday life that it's obvious that it would also have some important symbolism to go with it. Without water on Earth, there would be no life on Earth. No other planets that we know of have water, and because of that, no life on it. Water itself is a great symbol of life. Life energy, motion, and even fertility are wonderfully symbolized by water.

RELIGIOUS MEANING OF WATER

- Water is also highly important in many religions. These religions add their own symbolism into things, especially when it comes to something so important as water. In Judeo-Christian religions water is said to be symbolic of a type of purity and cleanliness. Water is used in baptisms.

THANKS FOR WATCHING!
