

Our Institute offers pupils aged 3 to 14 an organic and unitary training course centered on building skills. In this perspective, the work carried out in a synergistic manner within all three school levels aims at acquiring awareness of the processes implemented and at the constant sharing of goals and objectives for the achievement of the educational success of each pupil.

OUR SCHOOL AIMS TO BE

A school THAT WELCOMES, able to make the acquisition of knowledge motivating and rewarding, respecting the times and learning styles of each

A TRAINING school, able to promote in the pupil, through the plurality of knowledge and experience, the acquisition of knowledge, skills and competences to make informed and responsible choices in the training course as well as in daily life

An OPEN school, which acts as a permanent laboratory of educational innovation and as an active community aimed at the territory, capable of developing and increasing interaction and sharing with families and with the entire school community

An INCLUSIVE school that, aware of the diversity present in the socio-economic background of the pupils and in their family and personal realities, is attentive to supporting the various frailties and at the same time to enhancing talents, a school that appreciates differences as resources and favors the encounter between different cultures and different social realities of the territory

A school FOR ACTIVE AND DEMOCRATIC CITIZENSHIP, which values intercultural education and peace, respect for diversity and care for common goods, the environment, in the awareness of everyone's rights and duties
