Good Practices

"Cybersecurity Schools"

Planning Good Practices

- In eTwinning I have created the space for our good practices. I need you to log in to TwinSpace and collaborate on these teachers' tasks:

  - **TASKS:** It's a planning open to your contributions. It is necessary to establish approximate dates for its realization. You can add other activities that you consider convenient or important for the project.

  - **TOPICS:** It's my proposal of topics. I have created a discussion activity for us to comment our opinions and proposals. It is important to close this section. The activities must all have the same thread.

Planning
Good Practices

- **TEMPLATES:** I have given you two possible templates to write our activities. It is important that we all have the same model. I have created a survey and discussion group.

- **Criteria to be an international cybermentor pupil:** I would like you to edit the page with your contributions.

- **Formation of the international groups of cybermentor students:** We don't need to configure them all. It is important that we decide who the students of unit 1 are.

Thank you so much!
