

Salerno the capital city of our province

Salerno, in the Middle Ages, was the seat of the first Medical school in Europe. It was the meeting point between scholars and doctors in the Mediterranean countries

Salerno is a city of Campania region, It's in between, the Amalfi coast and the Cilento one.

The First medical school in Europe was born in Salerno. In the province of Salerno there is Paestum, one of the most important archeological sites dating back to the Magna Grecia period.

In Salerno there are The Gardens of Minerva that I visited and I recommend.

Other places is the Archeological museum.

The Amalfi coast; The abbey in Padula and Paestum with Greek temples dating back to the Magna Grecia

In Salerno province there is also the abbey in Padula; it is the largest in Europe. Inside it, there is a church of San Giorgio, the secret of this church, is that under the floor there is a mystery, this church was founded in 819 A. D.

Finally if you go to Salerno you look a magnificent panorama in front of the sea and there is Crescent in piazza della Libertà. The Crescent is a modern and beautiful Hotel. I visited and I was amazed from it.

Salerno is big city with big monument, I like this city.
