

# MIRACLE LIQUID ROBOT

BY LIQUAIA

*“Our mission is to reduce  
packaging waste and to  
make future bright.”*

# Problem

## Packaging waste

Plastic is really hard to destroy completely. It takes up to 500 years to destroy plastic. Animals are in danger because of them, because plastic could kill them.

Fields are filled with plastic which is bad for the environment and humans.

The unknown effects of microplastics on human health.

# Solution

## MIRACLE LIQUID

The miracle liquid is composed of materials obtained from special minerals, whose particles react in contact with the plastic and dissolve it.

# Prototype

MIRACLE LIQUID

# HOW IT WORKS

## Miracle liquid robot

The robot has the miracle liquid in it. You put any kind of plastic or packaging in it and it dissolves it.

# TARGET MARKET

Companies who don't want to throw the plastic away but dissolve it.

Responsible people who care for the planet and the future.

Governments and local authorities: places like fields that are filled with plastic trash.

# Competition

Our competition will be recycling companies, especially plastic recycling companies, because we are planning to eliminate it, as well as we'll be a big and dangerous competence for them.

# *Revenue model*

- We sell our product to different investors
- We make our own website where we can sell it
- Companies that want to erradicate the plastic waste they create.

# *Marketing strategy*

- influencers (healthy lifestyle, vegans)
- commercials
- free trips to our laboratory to see the process

# Team

Our team is responsible and we want to change the world for the better.

**THANK YOU FOR  
WATCHING!**
