

## Erasmus+ “Young people and urban citizenship – your project work“

Monday, 17th of February 2020

Lilli Birkner

We had a very fun day!

We had a tour through the school and setted up the teams for the project work, where we got to know more about each other, which was very interesting.

In the evening we went to the Levo hunting lodge. In the cottage we played games, sang songs for each country and went to the sauna.

Through the whole day we were in contact with everyone and learned more about the other countries.

Tuesday, 18th of February 2020

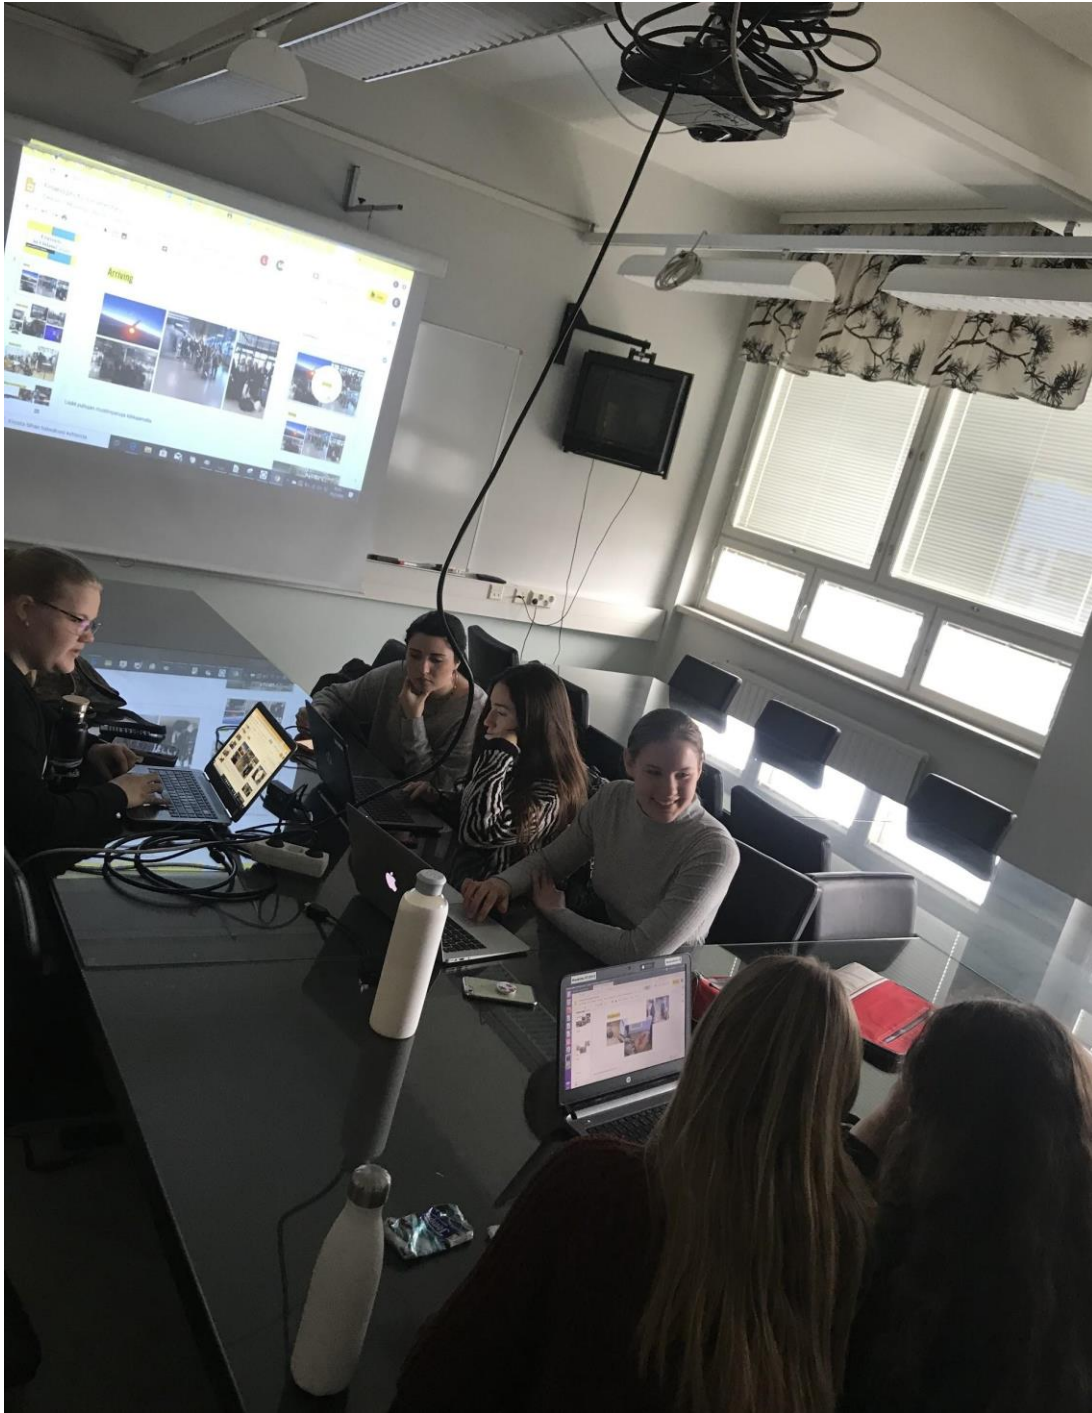

On Tuesday we went to Tampere, the closest bigger city.

There we visited Frenckell. The people there explained us some new technologies which can help us to save energy, for example sensors which notice if a window is leaking.

On this day I learned that innovations like that are very important because we don't lose energy.

My photo documentary group took a lot of photos, which we have to put in a slideshow the next day.

Wednesday , 19th of February 2020

Today, every group is working hard on their projects. We put all of our photos in a slideshow to present them on Thursday to the others.

Everybody in our group has got a task to do.

We divided it up, so some of us are walking around and taking pictures while the others arrange the presentation.

In the afternoon we visited the Pukstavi book museum in sastamala.

Thursday, 20th of February 2020

On the last day every group finished their project work. My group, the photo documentary group, didn't have any issues.

Afterwards, the learning task groups presented their ideas, how they would improve the Tampere.finland app. They all had different interesting ideas and presented them very well. Out of their ideas i learned a lot.
