## **Young people and urban citizenship – Students managing photo and video projects on urban chances and challenges**

### ***Your task for our project meeting in Germany***

During our project meeting in Germany we will explore a cultural hotspot in Stuttgart, the so-called “Kulturmeile” – a district in Stuttgart where you can find a lot of Stuttgart’s major cultural institutions, i.e. theatres, museums, galleries, libraries.

**Find out about other cultural institutions, organisations, events or examples of public art in our region and prepare a photo documentary (e.g. slide show) or a short video clip on one of them.**

Please consider the criteria for creating photo documentaries and video clips (see extra worksheet).

The presentation of your photo documentary or video clip including your commentary should not take longer than 5-8 minutes.

Take into account aspects of urban development, e.g. the type of institution(s), public accessibility, public response, location of cultural institution and/or organisations, the architectural style of the building(s).
