

Erasmus+ „ Young people and urban citizenship- your project work“ – Learning diary

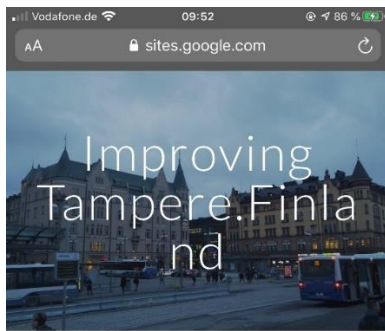

Monday (17.02.2020): We shared our thoughts about the task and discussed what we should do or what we can change. At the beginning we had a few problems with communication because of the language. But after a little bit of time the communication got better and we learned how to work together as a good team.

Tuesday(18.02.2020): We toured the Stardust company, which also is part of the changing programme in Tampere. We learned how to make Tampere more eco-friendly. Also, we looked around at Tampere to search for new ideas and problems, which we could include in our work.

Wednesday(19.02.2020): We started to finalize our ideas and discussed the best way of putting them into practice. Therefore, we started making our presentation to sum up our ideas.

Thursday(20.02.2020): We presented our ideas to the audience and the other learning task groups. In conclusion you can say that our team has worked really well together because we listened to each other, respected all the different opinions we had and included them in our final result. That's why you can say that our final result is a presentation of all our thoughts and approaches. Throughout the project, I learned how important it is to listen to each other and to try to understand each other's thoughts and positions. Because often the different ideas and perspectives on things make a good result, in which many perspectives and ideas are covered.
