

“Slow down education in the nature” activities till 22.10.2021

Stalģene Secondary school

Presentation of Camp to schoolmates

- On the first weeks in September students who took part in the “Summer Camp”, presented their skills and knowledge gained during camp to their schoolmates.
- Skills gained during the project are acquired in PE; also 7th formers together with the leader of camp`s “Healthy food” group made healthy burgers at class party.

Starting with work on Research/project activity

- There are regulations that every student in our school must do a project work - start on September and present at the end of school year.
- Students who participated in the “Summer Camp” have made groups, have chosen topics and have already started to work on that.
- Main topics: activities/games for STEM subjects; healthy lifestyle.

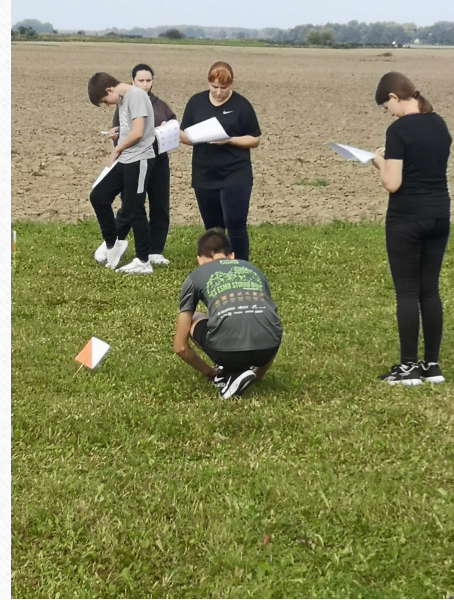

Essays on virtual tour

- On 21st April students of 6 - 9 class went on a virtual tour to Biomass Cogeneration station Fortum in Jelgava
- It was a virtual guiding tour around the premises of the station during which students were acquainted with the business of an undertaking.
- After the tour every participant had a possibility to express their point of view about what was seen.
- Three essays were translated into English and placed in Google Drive and in Twinspace

Work at Hobby group activities is taken up

- In spring evaluation of Hobby group`s work was done (both teacher`s and students` assesement) and based on that programme of Hobby group was improved.
- Students` group and timetable are made.
- Activities: orientation using map nearby the school; orientation in maze made in the park next to school; photo orientation in the nearest surroundings.
- During the “Summer Camp” Sport group, participants from each country taught games and activities played in their country. Now these games are acquired in all classes at our school.

Activities in nature

- In front of the school there are put up open-air fitness equipments which are actively used by students during long brakes, PE lessons and after the lessons.
- Maze is made in school`s park where students spend their free time (lesson breaks and after lessons).
- Outdoor equipmet and climbing wall in Sport hall are purchased within this project (Exceptional costs)

Presentation of the project in Jelgava county and for delegation of foreign countries.

- Project “Slow down education in the nature” was presented to Maths teachers from Jelgava county schools, who were acquainted with main ideas, benefits and experience about STEM lessons held in nature.
- In our school we welcomed in participants of Erasmus + “MathemaTIKs for Primary School Teachers” project from Poland and Spain, who were acquainted with our project and out of the ordinary teaching methods (educational games and lessons in nature) in Maths.
