

ETWINNING GOES TO DISNEY

eTwinning project 2019-20:

Laviana, Spain - Acharnes, Greece

Students from Greece and Spain work on Disney, a world most students know, as a starting point to reflect on deeper issues such as women roles, or stereotypes. There are several stages, each with a very clear objective.

Students work in transnational teams most of the time, using the means offered by the twinspace to communicate and share their work.

Some of the activities were aimed at sharing the project with the school community (questionnaires, notice board, games,...), although coronavirus changed this a little bit.

Games, both creating and playing, are prioritised.

The project is created and directed by English teachers, and English will be the lingua franca, but a little French was added.

Coronavirus made our project even more important for us since it was our first means of communication during our confinement.
