

CAMPUS HARLINDIS & RELINDIS MAASEIK, BELGIUM

HOW DID WE DO IT?

1. Choose a subject
2. Look up information
3. Write a paper
4. Conducting surveys
5. Make a prezi

The life of a meat rabbit

from newborn rabbits to rabbit meat

1. Birth

inseminated with hormones

31 days

birth to 9 to 10 babies

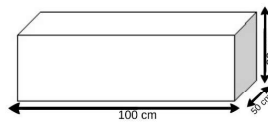

→ 7 to 8 births a year

2. Small cages

cause → effect

- | | |
|--|--|
| <ul style="list-style-type: none"> • material • low • boredom and frustration • ammoniac • a lack of healthy food | <ul style="list-style-type: none"> • injured paws • deformed spine • abnormal behavior and cannibalism • breathing disorders • diarrhea |
|--|--|

3. Transport

4. After transport

Waiting...

5. Slaughterhouse

Different methods

- Blow to the head in order to dislocate the neck
- Electric stunning and the necks get cut

Survey

What do people think?

Changing habits?

Are you going to adapt your buying behavior if you know more about the production process?
