Hello Lego Team,

My name is Evgeniya Angelova and I'm part of an international teacher's team, participating in an European eTwinning Project. The team consists of three kindergartens from Bulgaria, Poland and Spain, respectively. In the course of the last eight months, me and my colleagues, Lidia Pena (Spain) and Brygida Berowska / Iona Kazmirek (Poland), in collaboration with our classes, have been working on a project, titled "Storytelling with Lego", enchanted by the magic of the Lego blocks.

As a result of our mutual collaboration, we have created an interesting e-book <http://www.calameo.com/read/00463265313a8f6c3359f/> and it would be a pleasure for us to share it with LEGO.

Based on our project experience, we have concluded, that by playing with Lego products, our children have developed their constructive skills, creativity and imagination. In addition, by creating short stories, based on scenes created with Lego products, the children have further enhanced their communication competence.

Thank you for the wide variety of your product range!

We would be extremely happy if you could find a way to stimulate and encourage our little authors! If you are interested, we will gladly provide more elaborate information for our project activity!

Thank You in advance!

Sincerely,

Evgeniya Angelova
