WHAT IS GEOGEBRA?

Geogebra is an educational application that we use in our mathematics classes to represent functions and figures.

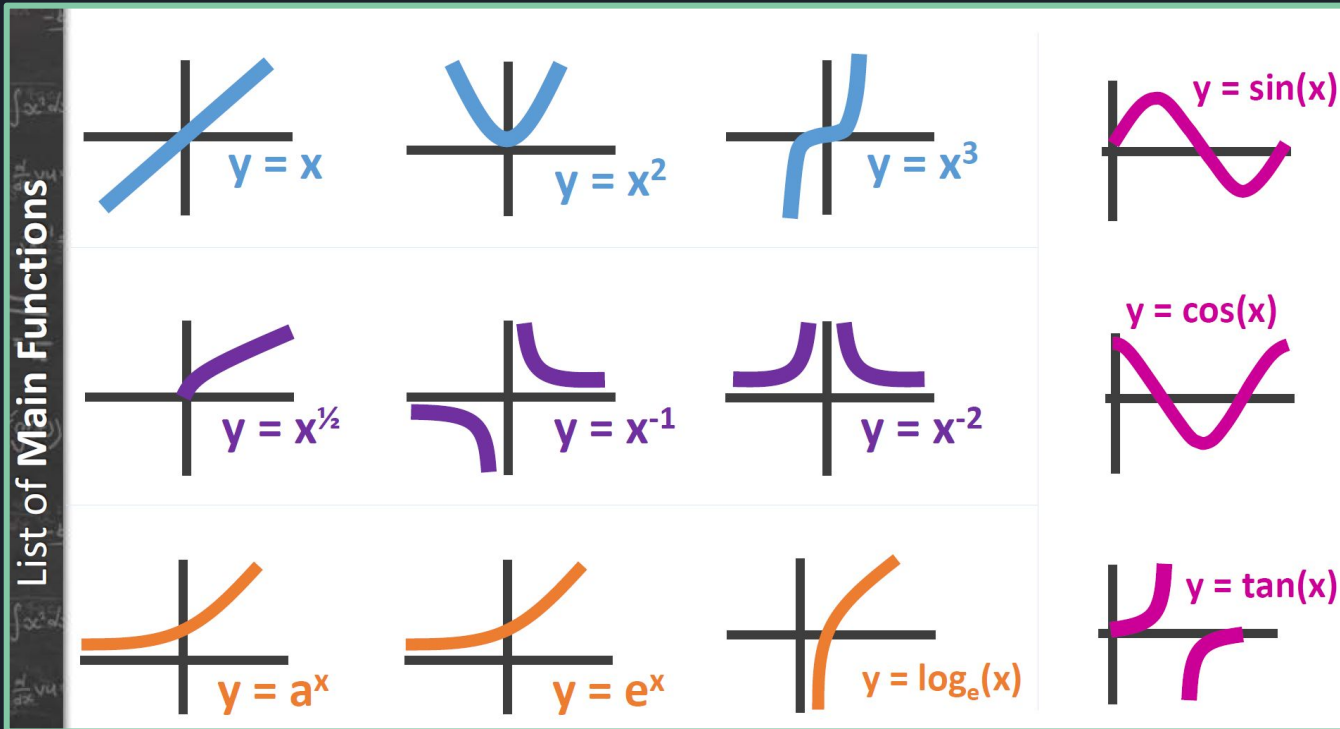

HOW IS IT USEFUL?

We use it to represent mathematical expressions graphically.

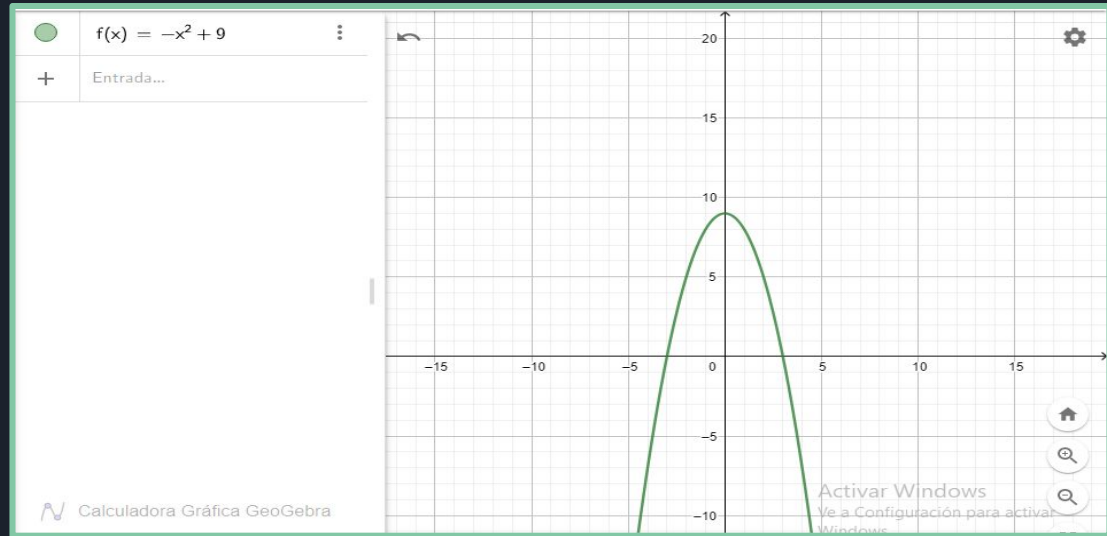

With this our mathematics classes are more didactic.

DIFFERENT TYPES OF MATHEMATICAL FUNCTIONS:

WHAT IS A PARABOLA?

It is a graphical representation that we obtain when we use a specific type of function which have the shape of a mountain. We will use it now.

EXAMPLE APPLIED
TO THE LOGO OF A
LARGE COMPANY

Now we will
show you a
video
explaining this
task, we hope
you enjoy it =)

OLEEEE
ARSA!!!
