

Why we used "Storybird"

The reason we have chosen **Storybird**:

It is a very good tool for cultivating pupils 'language' and fluency, either in oral description or in written texts.

The user has the option to describe Pictures of his/her own interest, and produce small poems or picture books.

My pupils enjoyed using Storybird very much and they wanted to go on working and writing non stop! Something that happens rarely in the common notebooks. We are planning to continue this type of production next school year!
