

Memories of the Rally

Every year, it was customary in our center to organize the Rally. This consisted of an excursion of 3 or 4 days duration, with the students of 3rd year of the high school, on foot, where the students toured around our region of Anoia, spending the nights in areas of 'camping or in school hostels. Along the way they found several springs and one of the activities was to measure their flow. It was done by calculating the time it takes to imply a 1.5 L bottle of water.

In 2019 it was not possible to visit all these sources, but if we look at the attached table, one of them, that of the Casals was already dry. The last two years have not been possible due to the pandemic. We hope to do it again next year and that the sources are not affected by climate change.

Cabal de les Fonts durant el Ral·li (en cl/s)

FONT	2010	2015	2018	2019	
La Grua	2,75	0,97	4,72		
Teix	2,23	0,59	1,94
