

TYPES OF RENEWABLE

ENERGIES

WIND ENERGY.

Advantage: doesn't produce carbon dioxide

Disadvantage: it's too expensive

SOLAR ENERGY.

Advantages: it's renewable

Disadvantage: it's too expensive and if the sun explodes it won't exist anymore

TIDAL ENERGY.

Advantage: A highly predictable energy source

Disadvantage: Negative influence on marine life forms.

HYDROELECTRIC

advantatge: Emission free

disadvantatge: Impact on fish

GEOHERMAL ENERGY.

Advantage: it doesn't produce greenhouse effect gases.

Disadvantages: it makes big holes on the ground, and that makes it very expensive.
