How to save Planet ?

Little steps make a big difference ...

Anonymous 19h

Eco friendly ways to get a cleaner planet.

There are so many different efficient ways to save energy and in general our planet. To begin with, we should turn the lights off when we leave a room to save energy. Another solution is to use less plastic items and prefer products that can be used multiple times. Last but not least, the cities must provide more recycle bins in school areas.

Giannadaki Maria
