

# Your trousers weigh a ton!

Every newly manufactured pair of cotton trousers generates waste that consumers never see.

Waste footprint

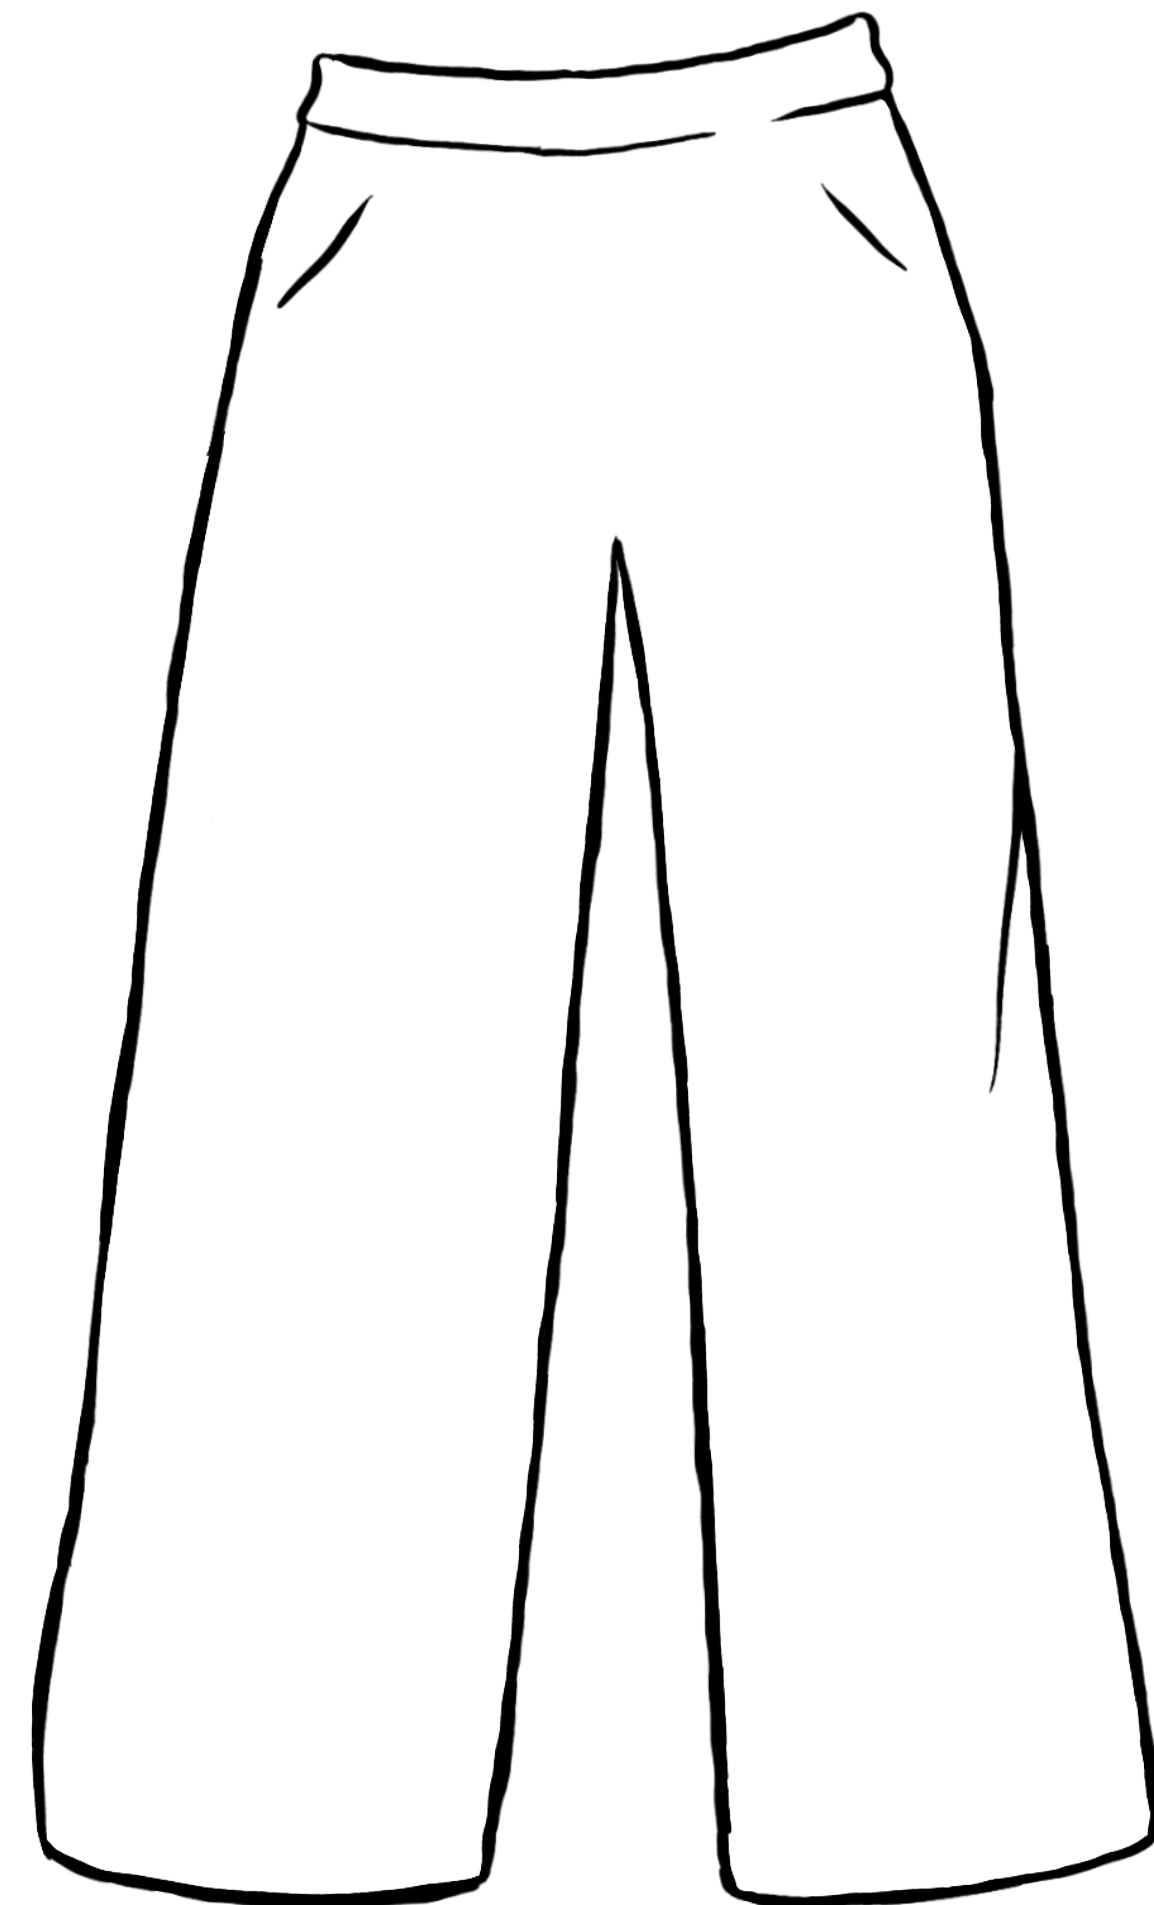

## 25 kg

### 6,3 kg

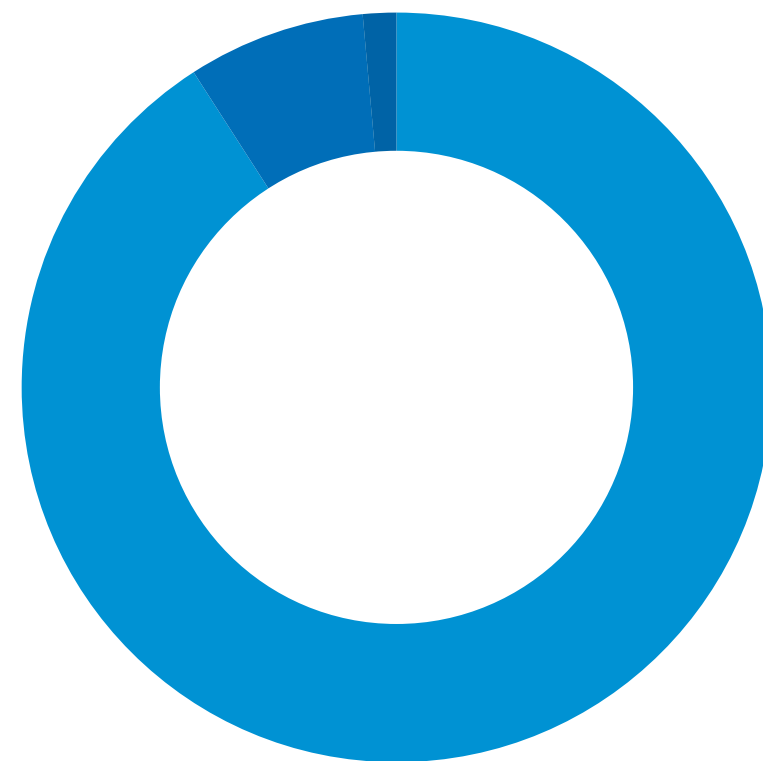

Climate cost

0,85 €

Waste sources:

- Fabric 91 %
- Metal parts 7,6 %
- Other 1,4 %

Do you feel like changing your style but buying new clothes makes you feel too heavy?

Here is what you can do for the **EWWR**:

- Organise a swap party or a swap market to exchange clothes
- Set up a second-hand market
- Organise an upcycling contest
- Organise a collection of clothes or other items and donate them to social enterprises, schools or reuse organisations
