Portfolios in transnational
groups using blogs

Which activity do you find the most interesting?

Why?

Inviting experts because it is very interesting for students to contact experts in this subject to have more credible informations

Students peer learning objectives in this part of the course and I was able to distinguish between formative and diagnostic evaluation

How can climate change be resolved?

Climate change is everyone's social responsibility. Against global warming, we need to protect the green, to protect the nature, we need to save energy, we must walk without getting in the carriage. We shouldn't put the soil, we should recycle the

Climate change atıklarla

Could you use it with your students?

How was the webinar?
