

THE PHOTOSYNTHESIS

1. Complete the text:

In the leaves, in , chlorophyll captures the to transform water and carbon dioxide into and oxygen. This is .

Some of this glucose is stored in the form of and part of that oxygen is released.

Still in the leaves, in the , glucose and oxygen react by producing and with the release of .

This is .

energy, chloroplasts, photosynthesis, carbon dioxide, water vapor, glucose, cellular respiration, light, mitochondria, starch

2. Complete the diagram with the correct words.
