

<p>SUPER SCIENTIST: EXCRETORY SYSTEM TEST.</p> <p>NAME:</p> <p>DATE:</p>	<p>SCIENCE:</p>
---	-----------------

1.- TEST. Answer the following questions.

1. Match the functions of our excretory system depending with the proper organs/systems:

- | | |
|---|---------------------------|
| <p><input type="radio"/> To remove harmful gases when we exhale.</p> | <p>* DIGESTIVE SYSTEM</p> |
| <p><input type="radio"/> To expel the undigested food which our body does not need.</p> | <p>* URINARY SYSTEM</p> |
| <p><input type="radio"/> To remove dead cells, salt and unused water from sweating.</p> | <p>* LUNGS</p> |
| <p><input type="radio"/> To remove waste and keep our body clean.</p> | <p>* SKIN</p> |

2. Sweat is made up of

- Water
- Water and minerals which body does not need
- Water and Salt
- Salt

3. Which is NOT part of the Excretory System?

- Skin
- Kidney
- Heart
- Lungs

4. Which of the following parts is NOT found in the Urinary system?

- A) Ureters
- B) Urethra
- C) Bladder
- D) Rectum

5. The main function of the urinary system is to:

- A) Remove waste and extra fluid from our body
- B) Keep waste in the body
- C) Get rid of nutrients
- D) Make you poop

6. What very important job do kidneys have?

- A) To reabsorb useful nutrients
- B) To filter waste out of the blood
- C) All of the above
- D) None of the above

7. Kidney shape is like

- Apples
- Beans
- Oranges
- Grapes

8. How many kidneys a human has?

- 2
- 3
- 4
- 7

9. Urine is carried from the kidneys to the bladder by two thin tubes called:

- A) Ureters
- B) Tubulars
- C) Capillaries
- D) Urinary tracts

10. Urine is stored here until you're ready to pee:

- A) Kidneys
- B) Bladder
- C) The garage
- D) Urethra

11. The _____ is a muscle that prevents urine from exiting the bladder until you're ready to pee.

- A) Calf

- B) Quadriceps
- C) Pectoral
- D) Sphincter

12. Urine exits the bladder and the body through a tube called the:

- A) Ureter
- B) Urinary tract
- C) Urethra
- D) Bladder

13. If your pee is light or pale yellow, it means that:

- A) You are hydrated
- B) You're dehydrated
- C) You don't have enough yellow food dye in your diet
- D) You aren't getting enough sun

14. Urine is made of:

- A) Water and nutrients
- B) Water and lemonade
- C) Everything you drank that day
- D) Water and waste products

15. Why is it important to pee when you have to?

- A) To remove toxins and other harmful things from your blood
- B) So your kidneys and bladder stay healthy
- C) So you don't pee your pants
- D) All of the above

2. Label the diagram of the excretory system.
