## Letters from the Past

Hi there! My name is Marius. I am fifteen years old, and I live in Selbu, Norway. My family consists of my mom and dad, my little sister, my cat and me. They are a nice gang, and I love'em a lot. My favorite subjects are English, music and art. I like these subjects because they give me the opportunity to express myself. On my spare time, I like to cruise the streets on my skateboard, listen to music and watch series on Netflix. I also collect vinyl records. There is just something about the feeling of a good record, it's hard for me to explain. Either you feel the same or you don't. When it comes to fashion I honestly don't care what is "in" or "out". I do not like wearing the same as everyone else, I like having my own style. I do care about what I wear quite a bit though, I enjoy being well dressed at all times.

My favorite book is "Lolita" by Vladimir Nabokov. Music is a big part of my life, I don't think I'd make it without music. Right now I've listening to Sun Araw, he is a quite talented individual. My favorite artist would have to be maybe Sigur Ros or King Krule.

My day today have consisted of sleeping and watching "Dexter" for three hours straight. I'm actually quite good at sports, I just don't like them. I guess if I'd have to pick a favorite it would have to be basketball. I admire Pontus Alv for all his work and everything he has contributed to skateboarding.

I have no idea how my future is going to be. My only wish is to someday be happy and satisfied with things. My dream is to travel I guess, to see the world.

My message to the next generation is; don't be a jerk. Simple as that.

Best regards

Marius
