

Dear friend from the future,

my name is Vasilis Rizos and I study at the 1st Gymnasium of Ampelokipoi. My family is composed of my father, my mother and my sister Maria. Maria is also studying at the same school as I am.

I have a lot in common with my sister. We practice Judo and we sail together. In my free time I paint or I play the guitar. Also, every summer I enjoy diving in the sea.

My dream is to sail the sea with my friends. I want to discover the whole world on a sailboat, visit every island and dive to unexplored depths. I want to swim along the pink dolphins and discover the largest moray eel in the world. I want to swim with every kind of shark: the white shark, the hammerhead shark, the tiger shark and the whale shark. Also, I want to study marine biology. I will chase my dreams and I believe that I will succeed.

But now let's talk about my daily routine. It might sound a bit funny, but your daily life is probably different than ours. Every working day all I do is to go to school and then study at home. However, every weekend I sail my sailboat!

Everyday problems never end! Especially if you live in Greece which faces a major economic crisis. Some people are hungry and they cannot buy food. Others are dying because of their problems. I hope that you do not have these kind of problems.

Vasilis Rizos
