

for future generations...

## Hello!

My name is Amelia Klimek. I'm eleven years old and I go to the Primary School number 4. In my school we don't wear school uniforms. I go to the sports class and we need to put a lot of work and effort to be good at sport. I love PE and Polish lessons but I don't like Science. Every Wednesday I go to the art school. We learn how to draw and use a variety of painting techniques. I have got a sister called Maja. She is 8 years old.

In this project we want to show you the life and technology we have right now but I would like to know more about your life in 100 years.

Greetings and hugs! Amelia
