

8<sup>th</sup> September 2014

Hello,

My name is Kacper. I'm fourteen years old, I live in Piotrowice, little village in Poland on South Silesia. I study in Mikolaj Kopernik Middle School in Mewiku.

I have a lot of passions. I love reading books, play computer games and listening to music. I also like playing volleyball, but I'm really bad at it. My favourite music genre is nu metal - mixing hip-hop, heavy rock, DJ techniques and aggressive vocal. My favourite music band is Linkin Park. My favourite passion is playing the piano. Tomorrow I'm starting 3<sup>rd</sup> year practise of playing. I hope you also have a passion that make your life better.

Normal polish school is: noisy, but friendly, strict, but fair. Teachers are demanding, because they want have smart students.

I'm really interested, how is your school. My favourite school subjects are: ICT, Geography, English, Polish and History. I don't like: Biology, Physics and Chemistry. They are very boring and difficult school subjects.

I would be an informatic technology specialist, a programmer, in the future. That job is interesting and profitable: good programmer in Poland can earn 6500 zł (1250 £)! I would become a programmer, because I'd like make computer games. My biggest dream is working for „Ubisoft” in Montreal. Interesting, how is your dreams.

That's all about me. Now, I would write something about technology in 2014, because I definitely know now are different and more complex items. When I write this letter, very popular and smart items are smartphones - phones with touchscreens, laptops - portable computers and tablets - portable computers, but they haven't got any real keyboard. The most popular item in houses

(only for playing games) are consoles. The most popular consoles are PlayStation and Xbox. If you need something to work and something to play games, you buy a desktop.

It's all interesting about my life and my world. Your life is definitely different. You should read this almost in 2M0.

I don't know who you are, where you live, but I hope that my letter interested you.

I wish you great life and fame  
Kasper
