

Dear friend from the future,

My name is Alina Tsaroucha and I am 15 years old. I live in Greece, in the beautiful Thessaloniki. I live in the fifth floor of a block of flats. My family contains of three members, me, my mother and my father. My school is the 1st junior high school of Ampelokipoi and I have been there for three years, the best years of my life!!! My teachers are amazing and they consider every child's difficulty and attempt to help it. I admire them all so much especially the philologists and maybe this is the reason why I love the subject of language and literature.

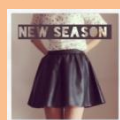

Generally, I have no leisure time ,but when I do I really like reading books , my favourite is called "the fault in our stars" (see here "http://en.wikipedia.org/wiki/The_Fault_in_Our_Stars") watching videos and the two last years I have developed a really interesting hobby ,watching movies every Saturday evening with my parents. Recently , my favorite one is called "divergent " (see here "<https://www.youtube.com/watch?v=336qJITnDi0> ")but I have so many that I love that I cannot analyze them. Furthermore, listening to music, dancing and singing are my basic hobbies. My favorite music style is pop and hip hop - rap,"All of me (pop) (see here "<https://www.youtube.com/watch?v=Mk7-GRWq7wA>") and "get low"(hip hop) (see here "<https://www.youtube.com/watch?v=7nUdHAVSLr4> ") and "23" (rap) (see here "<https://www.youtube.com/watch?v=ww3UjE-iAbA>").

I want to be fashionable and I think I am: this is one of my daily clothing.

Fashionable means that you have a sense of beauty. This time the "fashion "is about wearing striped shirts, leather skirts and big

eyeglass frame. Look;

My daily routine is not so interesting. Every day I go to school and then come back to home, eat, take a nap and go to the English lesson. More

than everything, I like to go out with my family for some walks and especially I love going shopping!!! Sometimes I am so bored of all these that I am so close to give up but always I get encouraged and keep going on trying because I have one dream that I want to make it come true, I want to go around the world and especially in New York where I want to live and work like a philologist. I want to have a comfortable life, make my own money and be independent and have values to be based on.

I want to tell you my dear friend of the future that if you can be well-organized, you can succeed everything you desire. The only thing that you have to avoid is to be bad influenced, something that will guide you wrongly and make you feel miserably. Last but not least, I would like to know about your life even though I know this is not possible...

With love,

Alina
