

## A Letter to the next Generation♥

Hallo everyone! My name is Kioxaki Aggeliki. I come from Greece and I live in Thessaloniki and especially in Ampeloi Pous. I am 14 years old, moreover, I go to the third grade of junior high school.

I want to describe my family. First of all, my family consists of 5 members. Me, my sister, my father and my mother, and a new member my cute dog. My sister is 12 years old, she called Dimitra and she goes to the first grade of junior high school. Additionally, she takes karate and tradition dance and English lessons. My father is 45 years old, he called Sotiris and he passed in Gymnastics academy, he worked as a gymnastics for a few years, but he actually become a medical visitor. My mother is 39 years old, she passed in Gymnastics academy too, she works in Gyms or in schools as a gymnastic.

About my free time. When I have free time, because my free time is limited, I prefer watching TV programs or TV series on Youtube but on the other hand I like also reading books.

A sport that I work since 9 years is karate. I choose that, because through this sport I learn to attack or to defence in an emergency. However, I learn also to practice sports in a right way. The coaching is not easy but opposite it is harm and painful.

The dreams that I have for the nearly future is to go to the police leisure. A policewoman has a task of protecting the citizens from bad and dangerous people for a better society. That is what I have already chose to do.

A very important message that I want to give to the next generation, is to protect themselves, because our nowadays and more, the next generation's days will be very difficult and dangerous in social and

economic sector. Things goes from bad to worse. And one more thing to remember children, pay attention to your school and later in other sectors. Live sports or English schools.

But on the other hand, when you will find this colorful letter, technology sector will reach a next level, so people all over the world will not die from diseases, and the world will become better. I hope and I also believe that people will have a sense of loving, happiness and not dissensions.....
