

Selbu, Norway 17.11.2014

Dear reader!

*Hello, my name is Linn Therese, I am 14 years old. I live in Selbu with my mum and dad. I have also one brother and one sister. But they are over 20 years old, so they have moved out. I play handball and volleyball I love playing handball, it is so funny.*

*Selbu is a small community, it is so quiet to live here. We moved to Selbu when I was 3 years old. I thrive to live in Selbu, and it's very much forest here. In the middle of Selbu we have a sea, and it's called "Selbusjøen". Almost 4000 people live in Selbu.*

*When I finish school and getting older, I want to be a police. I hope I can be that, that is my biggest dream. I almost want to be a police, when I see tv- shows I am getting jealous.*

*I love listen to music, and my favorite artist is Justin Bieber, he has many good songs. And I love the text in the songs. It means so much. I have a favorite song. When he was in Norway, I had a dream. It was to be at his concert and meet him and get a hug. But I wasn't on the concert, and I am so sad because of that. It has meant so much to me, just to see him in real life. I can say that he has saved my life, and get me up to the top when I am sad. When I am sad or I just want to think about something else, I listen to his songs and then I begin to smile again.*

*I love to be out with friends, and do much crazy, and the best of all is to laugh together. My friends means so much to me, they help me when I need them and I can talk to them when I am sad. It's very cozy to eat food and see a very funny movie with them. We can laugh together, and I love that. I can't say it enough how much they mean to me. I have many friends, but my best friend is my brother. He have always supported me when I needed him. He is 7 years older than me, so he takes care of me. When some people aren't nice to me, he talks to them and then everything is ok. He has been there for me since I was little. We speak very much together about everything. It's always nice to see him.*

Thanks for reading ☺
