

# Letter

Hello! My name's Heger. I'm sixteen years old. I live in Spain with my mother, my older sister and my brother Felix. We live in a big flat in Madrid. Felix is very intelligent and tall, my mother is small and really she's handwriting and a very good cook. My sister is beautiful and small and very boring. My favourite subjects are P.E., English and Biology, because they aren't difficult for me and I get good marks. In my free time I study and I do my homework on Wednesdays. I collect newspapers because I like knowing about Spanish people's life. I don't mind reading books. My favourite book is 'The Prince of the Sea'. I listen to music. I like pop music. My favourite singer is Selena Gomez. In a normal day I go to school, after I go to home and I do my homework, and that's study. I don't play any sport. My favourite sport is hockey. I admire my grand mother and my dad, because they are good people and they give me some advice. I want to be a flight attendant and a lawyer. I would like to travel a lot. I have a message for the next generation: Read my letter and I hope you will visit my generation for the people know the future is what makes will you read!
