

ZERO HUNGER.

Naroa, Markel, Xiker and Uxue G.

TARGETS

-Don't go hungry and especially pregnant women and young children.

THE BIG QUESTIONS

-Where did it begin?

-Hunger began mostly with epidemics, poverty... For example this happened in Canada.

CONNECTION TO THE OTHER GOALS

-Our food cycle begins in the soil and the sea. When we take too much or we cut corners to try and get more, we damage the ecosystems we harvest and risk the ability for future generations to feed themselves and get nutrition. When the soil is damaged or the sea is too warm, the food becomes less nutritious and less beneficial for us.

What do Basque people do to help people?

-One of the associations in Gipuzkoa is Caritas.
-For example, they collect food, clothes... And people bring food, clothes to the collections stations... Then the associations distribute the food and clothes they have collected to.
