School Antero
de Quental**

Videos about surrounding nature

Students made the videos about their home areas nature.

Teamwork – creating posters Visiting Tallinn Botanical Garden

We visited the Tallinn Botanical Garden and got acquainted with the plants of different biomes.

Introducing our schools and students

Each student made her own portrait in the avatar and characterized herself.

Escape-room game

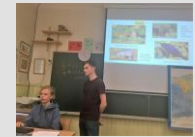

The most popular action was the Escape-room game, where students solved the different tasks.

Teamwork – searching information and creating presentations, Kahoots

Presentations and videos were created in international teams.

The students introduced their biomes to their fellow students

Teachers meetings

The project started in September. The teachers interacted with Skype and eTwinning Live.

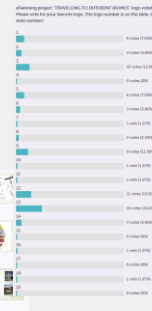

2nd Teacher's meeting.

Balance of activities in progress and preparation of future activities.

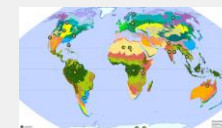

Logo competition

First of all, the logo competition took place in each participating school, the top five got to the final. In the international voting, our project got the top 5.

Results

Map with presentations

Here are presentations or videos about 20 different biomes (nature zones). Presentations and videos have been made using Google Presentations, Prezi and Powtoon.

Map with Kahoots

Here are Kahoots about 20 different biomes
