

# SPECIAL NEEDS STUDENTS

KARŞIYAKA ORTAOKULU  
İZMİR/TURKEY

2016

At our school there are seventeen (it can change every year) special needs students. According our educational system they study in the class with their friends but they have own individual educational programme .They have exams in the same time with other students but they have different questions.

After school, some of them go to the private school for special needs students. Our government support these private schools and pay some amount of money to families. If they want, they have extra lessons with teachers at school.

Our special need students have distractibility, low - level learning difficulties and dyslexia. Two students have hearing problem and use special equipment in their ears.

Our education system depends on integration  
not dissociation so Only the teachers know  
these special needs students.

Some of them were in our workshop activities. In the beginning they hesitated work on this project but when they noticed that they were successful on search about hero stories and decorate the history corner . They enjoyed all the activities. They were all happy when they saw their Works on the history corner

Working in a team increased their self reliance and they trusted themselves. They did their best.
