<center>**LESSON PLAN**</center>

Form: 3rd form

Subject: Maths

Teacher: Daiva Remeikienė

Topic of the lesson: Dividing by 10 and 100.

Methods: self-study ''Find a pair''.

Process of the lesson: teaching and learning activities

Students divide single digit numbers as well as tens and hundreds. Then they daw conclusions about the rule. After students have done exercises individually, they raise a hand and find a pair to check the answers. The teacher has to check just the work of weaker students.
