

IMPACT

Goals improving education

- Digitalising education in the kindergarden.

Goals internationalisation policy

Short term:

- Create an internationalisation group of teachers in our school.
- On a monthly basis, during our staff-meetings, we want to discuss internationalisation. By discussing it, everyone gets remembered, challenged and helped to set up a project. At the same time everyone is familiar with the projects of colleagues and we can see who needs help, and we can provide help. We want to secure this point in our 'Borgboek', so we can indicate that we pay attention to internationalisation.
- One E-Twinning project in the kindergarden with other countries.

Goals internationalisation policy

□ Long term:

- One E-Twinning project in the kindergarden, one project

 - in grade 1 untill 3, one project in grade 4 untill 6.

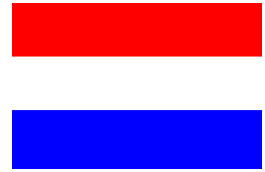

- Create a board in the hall of the school. This way all the visitors and pupils can see what we do with internationalisation.

Achieved goals

- Do an E-Twinning project in our own class.
- On a monthly basis, during our staff-meetings, we want to discuss internationalisation.
- Create a board in the hall of the school. So all the visitors and pupils can see what we do with internationalisation.

To do

One E-Twinning project in grade 1 until 3, one project in grade 4 until 6. They have to find a partner to do an E-Twinning project. They exchange their results.
