

How to stay safe on
internet?

WHY?

1 / It's important to keep your identity secured, because someone can betray your informations.

2 / If you download app from you browser, it's not necessary that you won't get virus, because all apps aren't safe.

3 / On internet are some fake news to, so you can't trust everything you see and read.

STAY

Browsing safe on internet is very important!

SAFE

Do not trust people, you don't know

ONLINE

HOW?

1 / Don't enter sensitive data, if you don't trust this websites.

2 / When you are browsing, open only safe  websites.

3 / Make sure that you have your VPN (virtual privat network) on
