### Creativity with poetry

We have decided to network with other European schools in order to promote multilingualism as well as poetry and art in general. Teachers and students will benefit from working on this project by developing their soft skills, language and ICT skills. Students will take an active part in their education by working on poetry. This project will make them more aware of European cultural heritage. The languages used in this project will be Croatian, English, German, Italian, Polish, Spanish and Turkish. As for the schools, this project will increase schools' visibility locally, nationally and internationally. The method used in this project will be blended learning where modern will be combined with the traditional. We will use web 2.0 tools and develop students' creativity at the same time.

#### Our poets in other languages

STEP 1: Choose your favourite poem and translate it into English / German / Italian... STEP 2: Put the poem and its translation on the Padlet Wall. STEP 3: Read poems from other Padlet walls your colleagues from Lithuania, Spain, Poland... have created and like them. STEP 4: Choose a poem from a Padlet your Lithuanian / Spanish / Polish... colleagues have created and translate it into your mother tongue. STEP 5: Put your translation under the poem you have translated.
