

09-2020	Ex-ante evaluation (initial evaluation): survey and interview to view the expectations of the project participants (students, their parents and teachers') as to the implementation of the project.
09-2020	Recruitment of project participants: declaration of participation, parents or legal guardians' agreement.
09-2020	Promotion of the project among the school community (students / parents / teachers) and locally through the school's website, facebook, the website of the school running authority, local newspaper.
09-2020	Project management meeting: appointment of a project team, presenting assumptions of the project and a schedule of activities.
10-2020	Earth Overshoot Day: measure classes' earth overshoot day - initial situation.
10-2020	School on a bike: each partner group, including eTwinning ones organizes a bike trip and in the next step converts the trip into an online tour in a chosen subject (maths, history, language, etc.).
10-2020	Renewing the existing project "Europe by bike" on the eTwinning platform and building a canvas - a story introducing the project's goals and tasks for a new school year.
11-2020	#MoveTheDate: Students determine factors to postpone Earth overshoot day and choose the factors that can be influenced by them. They decide on an action or actions to be held (i.e. zero waste week, everyone on bike day) and introduce their choice with Pecha Kucha or another new method of presentation to their schools societies. The action is held and a short report is added to #MoveTheDate Solutions on the official overshootday website.
11-2020	Teachers Development Club: teachers of both schools organise self-study to develop their VR skills and learn new presentation methods, i.e. Pecha Kucha, Genial.ly.
12-2020	The didactics of VR in the classroom: an eTwinning event around technical aspects of VR: teachers share their individual experience and knowledge in the VR solutions with the project colleagues from the other school; the event is also open to other European eTwinners.
01-2021	Project management meeting: preparation to ongoing evaluation.
02-2021	Ongoing evaluation: survey and interview to assess progress of the project towards objectives, resource usage and achievement of results and impacts.
02-2021	Culture and history around me: students of both schools develop VR skills while preparing tours for their peers from the other school to show each other their neighbourhood and to enhance mutual understanding of other culture or history.
03-2021	An annual school event "Science Festival" in Purda, Poland will be in air pollution topic: students will do a research in the subject, do tests, present their findings and propose solutions to keep air in the area clean.
03-2021	Ready-Steady-Go!: final preparations for group mobilities, i.e. parents meetings, insurance, accommodation and catering, organisation of trainings/workshops and excursions; promotion of the project.
04-2021	Week in the Netherlands

04-2021	Students of School in Purda make flower beds with Dutch tulips in the school field and in the centre of the village. They also build a recycled material windmill miniature.
05-2021	Week in Poland
06-2021	Follow-up of the project: the issue is described in details in the dedicated section of the application form.
06-2021	Ex-post evaluation: survey and interview to assess the level of the expectations the participants (students, their parents and teachers') expressed at the beginning of the project as well as measure classes' earth overshoot day - situation at the end of the project compared to the initial result.
06-2021	Project management meeting: preparation to ex-post evaluation, mobilities sum up, discussion on the project dissemination.
06-2021	Students of both schools prepare their proposals - students of School in Purda apply for building cycling lanes and teachers of School in Venlo apply for implementing VR in the curriculum.
08-2021	Closing activities such as report writing.

School on bike – eco in mind – in real life and VR; VROOEM
