

GoSun Chill: a solar cooler that doesn't need ice

An off-grid refrigerator without the noisy generator. GoSun joins the latest high-efficiency compressor technology with a solar-powered eco-system to keep you fueled and cooled no matter what. No more worries about crushing and freezing the food that's touching the ice or having to organize the sandwiches so they aren't drenched by the time you get there.

GENERIC	VS	CHILL
		
 Melty Mess Without careful attention, coolers destroy our food		 Clean & Dry Keep your goods fresh and ready to enjoy
 Needs Ice Ice will melt and send you back to the store for more		 Makes Ice This cooler is so powerful and efficient you can freeze
 Shorter Cool From freezing to melted, ice can't sustain the cool		 Longer Lasting The Powerbank provides up to 24 hours of cooling
 Ice Eats Space Ice takes up about 50% of the space available		 Spacious Without ice there's a bunch more room
 No Control Forget it. It's all just melting and getting warmer		 Temp. Control GoSun gives you a setting to optimize for your goods
