

IDEA 3

DONATE THINGS FOR CHILDREN

This idea of social entrepreneurship is an organization that offers food for children, but you can also donate clothes or something else that you do not use. Also people who no longer use the crib or other similar objects can donate it to this company. The things collected by the organization will go to families who do not have the money to be able to keep their children well and also offer them a kind of free daycare from Monday to Friday for parents who have to work
