

ECOSYSTEM TEAM

by Aylin Yıldırım and Alin Su Çevik

What is the ecosystem ?

Ecosystems are ecological systems that emerge with the mutual relations of living things in a certain part and their surroundings and exhibit continuity.

What to do ?

- * We should not apply wrong spraying and fertilizing.
- * We should do afforestation studies.
- * We should not allow unplanned urbanization and illegal structuring.
- * We must avoid human activities that will destroy nature.

Disruption Results of Ecosystems

- * Climates change.
- * Erosion increases.
- * Water resources are depleted.
- * Biodiversity decreases.
- Energy scarcity begins.
- * World geography is changing.
