

My music

Made by : Sára Ladányi and Eszter Saly

AC/DC

Guns and Roses

The Rolling Stones

Most people like going out at night. They usually go to different nightclubs. This is because they want to meet each other, relax, dance to their favorite music and have fun. The so-called 'night life' is very popular in the big cities, that includes being with friends, watching shows and being in a good mood.

Music genres

There are so many music genres in the world. Every country has its own folk music. Classical music and opera are also have great past. Nowadays a Capella is coming into vogue again. Jazz, blues, soul and gospel aren't as popular as they were, but a lot of people still love them these days. We think pop music is immortal, because it is melodic, it has catchy tune and it sounds good for everybody. Its subspecies are disco music in the seventies, the k-pop style in Asia, the hip hop and the rap. They're all really popular. Electronic music is flourishing now. It is produced with with synthesizers and computers. This music is the combination of hard bass and cadenced rhythm. The youngest and one of the best-known sub genres

is the dubstep. There are lighter and harder version of it. The next music genre is rock. Rock n' roll is formed of blues, jazz, country and gospel. Some of its sub genres: hard rock, heavy metal, punk rock, post-punk rock, jazz rock, alternative rock, indie (independent) rock, rock opera, etc. And that is our joint favorite.

Our favorite music

We both like rock music, and by common agreement our favorite band is AC/DC. Some of our relatives showed it and we found it catchy, we liked the rhythm and the harmony in the music. We most like their songs called TNT and Back in Black. They are from Australia, they formed in Sydney in '73. They play hard rock music. Their iconic singer is Brian Johnson, there are three members beside him: Angus Young, Chris Slade and Stevie Young. They are really popular, they have got an own video game. Unfortunately they will retire in a few years.
