

SURVEY RESULTS – ITALY INITIAL EVALUATION

AGE

16 risposte

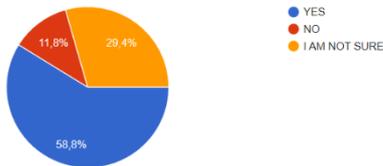

1.3. Do you know where these objects are recycled?

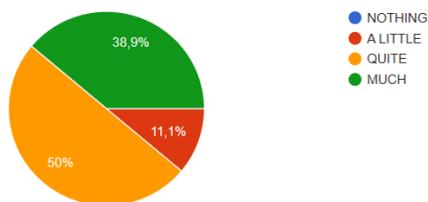

1.4. Do you know how the recycling process works?

17 risposte

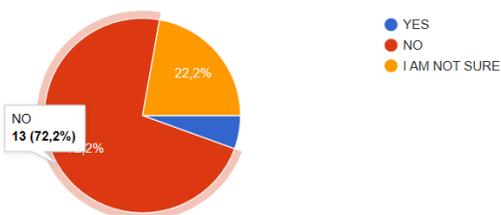

1.7. How much do you think you know about renewable energy?

18 risposte

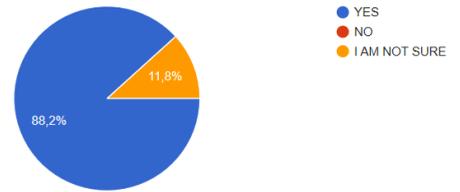

1.8. Do you know what energy efficiency means?

18 risposte

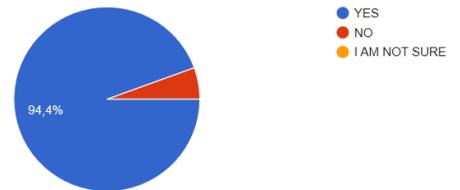

1. Theoretical knowledge *

17 risposte

1.2. Do you know the 3R rule?

18 risposte

The survey results show that most students know what recycling is and know 3Rs, but some do not know what is the right way to throw some recyclable waste or wrong container.

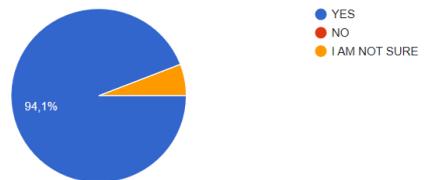

1.5. Do you know what climate change is?

16 risposte

1.6. Do you know what the greenhouse effect is?

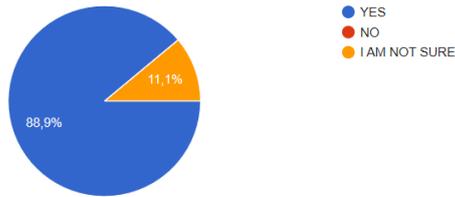

17 risposte

In general, they know what climate change and the greenhouse effect are, but they say they don't know what renewable energy is; only a few know what "energy efficiency" means.

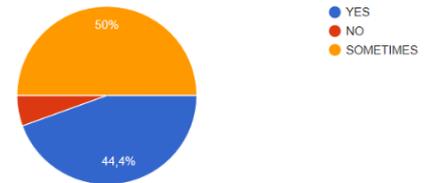

1.9. Could you name at least 5 animals that are in danger of extinction?

18 risposte

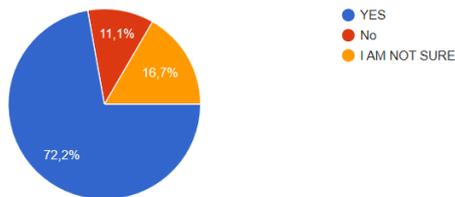

2.2. Do you think that many of the things thrown in the bin could be reused?

18 risposte

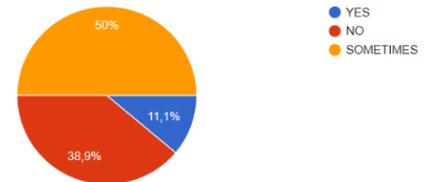

1.10. Could you explain what deforestation and biodiversity loss is?

18 risposte

2.3. When buying something, do you consider that they are responsible products with the environment?

18 risposte

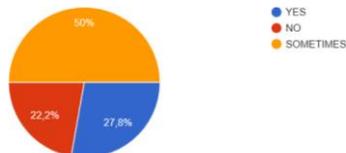

Most say they know about endangered animals deforestation or biodiversity.

50% of students think that anything thrown into the garbage can be reused. At the time of purchase and food, they are not responsible for the environment. 34% throw trash on the ground. Saving light and water is generally important in the home; however, the waste of disposable paper and plastics is high.

More than half think that people will take better care of the environment if there was more information about it.

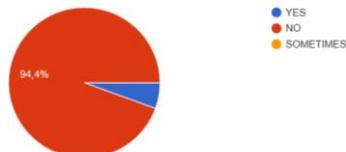

2.4. In your diet, are you responsible for the environment? Low meat diet, without palm oil, organic products, organic ...

18 risposte

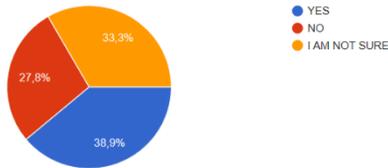

2.5. Do you throw bags, wrappers, papers or other objects on the floor?

18 risposte

2.7. Do you think people would take more care of the environment if there were more information or knowledge of the subject?

18 risposte

More than half think that people will take better care of the environment if there was more information about it.

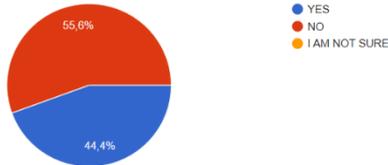

They know there are baskets for the school but more than half do not separate the waste at school.

94% of students think they are not doing enough.

Most worry about having a clean courtyard and believe that the dirt is mainly due to students and associates.

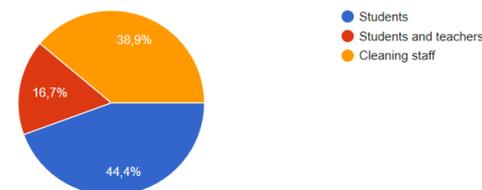

3. At School Level *

18 risposte

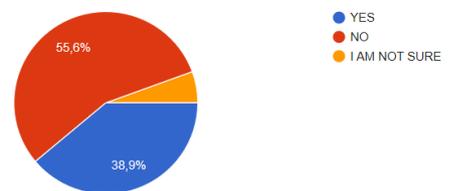

3.5. Do you think the cleaning problems are due to:

18 risposte

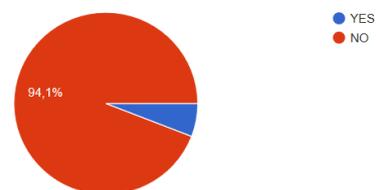

3.2. Do you separate waste at school?

18 risposte

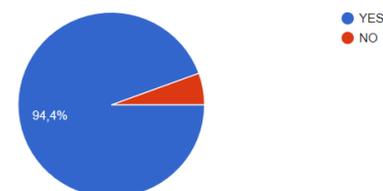

3.3. Do you think there are enough bins in the schoolyard?

17 risposte

3.6. Do you think it is important to do cleaning campaigns at school?

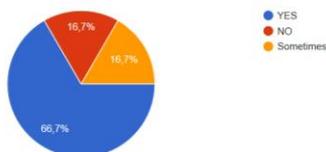

18 risposte

Almost all students say that it is important to do cleaning campaigns at school. Only 15% use reusable lunch boxes. The overwhelming majority think that the school has lights on unnecessarily and often forgets to turn them off. In general, they believe that improving their habits could improve the environment.

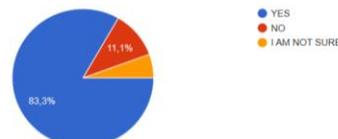

3.7. On excursions, do you worry about storing garbage in a bag and then throwing it in the container?

18 risposte

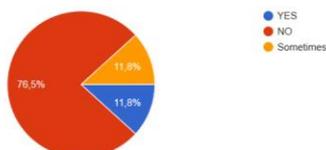

3.10. Do you think that by improving your habits at school you can do something for the environment?

18 risposte

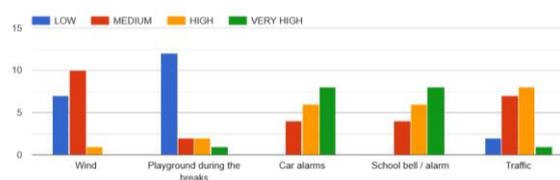

3.8. When you bring breakfast to school: do you use a tupper?

17 risposte

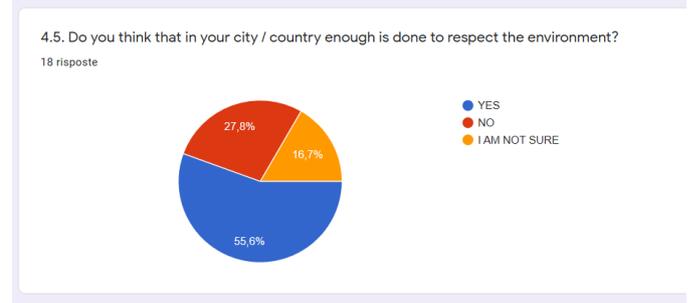

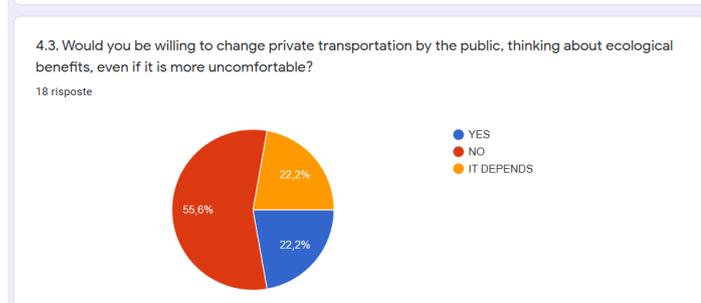

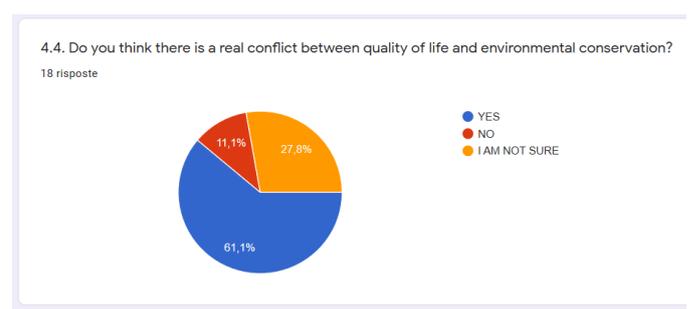

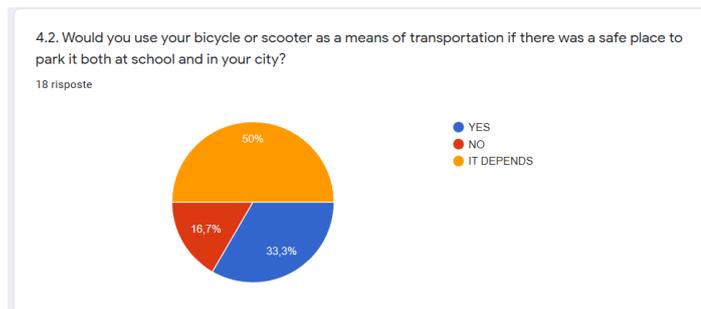

3.11. How would you rate the following noise levels? Low, medium, high, very high:

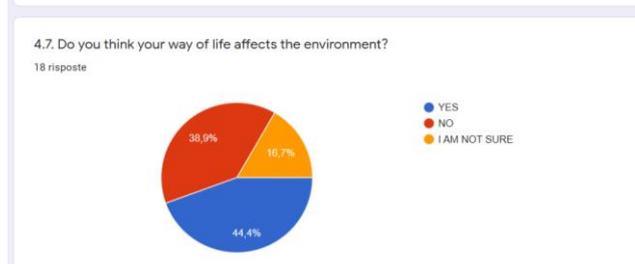

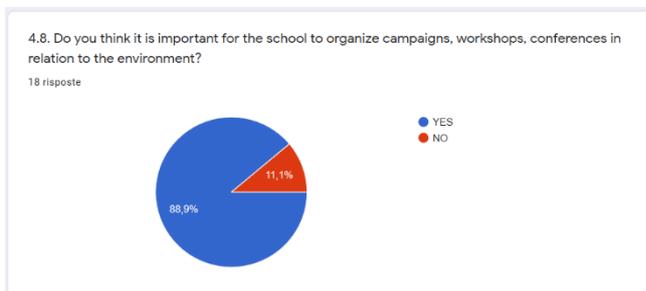

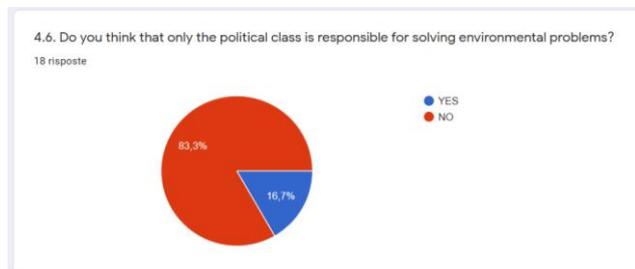

33% would cycle if they had a place in the school where they could park them safely.

Half of the students are not very sure or would not change the convenience of coming in private transport and changing it for the public, because it is better to go by car.

In general, a conflict exists between comfort and care for the environment. 1 in 2 students believe that nothing is done in our city or in our country to respect the environment, that politicians are not entirely responsible for ecological problems as our actions also affect and over 90% of students ask the school to organize campaigns, seminars, conferences and activities that help students understand, respect, care for and enhance the environment.

Many pupils are still not aware of the effects of their lifestyle on the environment.

These needs justify the school's participation in this project.
