

Gianelli campus

The Gianelli Campus, Scientific High School with a Sports Address, was born from the tradition of schools run by the daughters of Maria Santissima dell'Orto (known as the Gianelline nuns) founded by S. Antonio Maria Gianelli. The Chiavari school was born over a hundred years ago and from the beginning it has represented a training place of excellence, accompanying children in their growth from infancy to secondary school, first with the master's and the company technician, then with the scientific high school. Today over 500 teachers working in the area come from our institute.
