### Monday, 6th Mach 2017

All the participants met at school in 210 room. The teachers welcomed all guests. The Bulgarian hosts made presentations about Bulgaria, Sofia and our school 119 SU “Academician Mihail Arnaudov”. After that we were separated into groups made out of 4 people and the hosts showed the school to the guests. After the guided tour we had lunch in the school canteen. After the lunch the whole group went to the Polytechnical museum in Sofia. In the evening we showed our guests around the city center and we saw the big basilica “Aleksandar Nevski”.

### Tuesday, 7th Mach 2017

We had a strong start on Wednesday morning. We met in front of the school at about 9 o'clock and went on foot to “Muzeiko”, where we had workshops (we were separated in two groups). The first workshop was about recycling paper and the second one about CO2 and it's chemical properties. After that we had lunch in the school canteen again. After the lunch we planted trees in the school yard in the afternoon.

Wednesday, 8th March 2017

The group met in front of the central railway station in Sofia. From there we caught the train to Pernik. It's an industrial town. When we arrived there we went to the Regional History Museum. There we made some clay pots and plates.

After that we went to the Museum of Mining which was next to the history museum. We had a lunch in a restaurant in Pernik. After the lunch we had a walk around the city and then we caught the train back to Sofia.

*Thursday, 9th March 2017*

We met in front of the school from where we caught the subway to the UCTM. In the university we were presented a presentation about the university's past and other topics. We were shown how an Atomic adsorption analysis is held. After that we went to have

lunch.

After the lunch we went to school where we had a drawing competition on the topic - “For a better tomorrow”.

*Friday, 10th March 2017*

We met in front of the school and from there we went to the Sofia University. It's situated in one of the most air polluted parts of Sofia and we were supposed make observations and take pictures. Unfortunately the weather was not so great. It was cold and it was raining. So we went inside the university. There we were shown the university's museum which is on the last floor. Then we went to see the oldest part of the university's building.

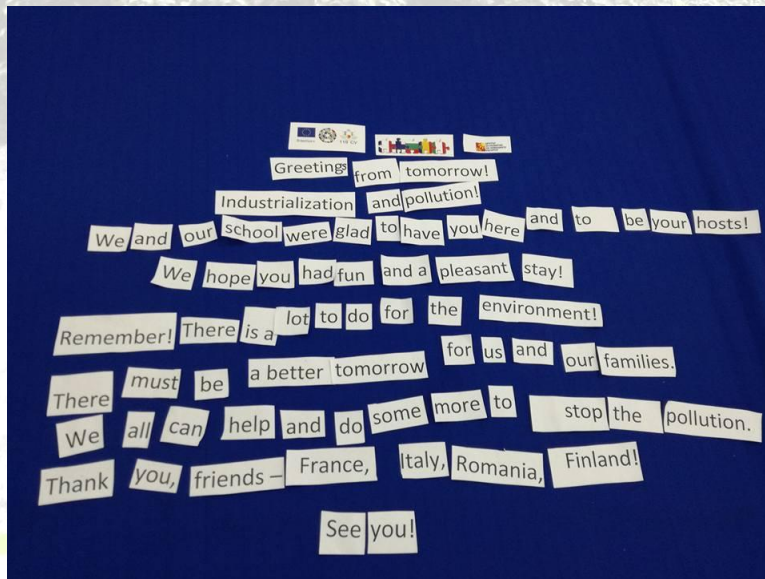

After we were shown everything in the university we went to see the monument Alexander Nevsky.

We had lunch each person with his mate.

After the lunch we went back to school where we had a really cool game. The result of the game was a letter linked to the end of the first international meeting in Bulgaria.

Then we went to the musical room where we had a party for the end of the meeting. It was time for goodbyes!

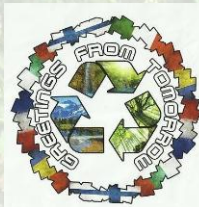

**It was amazing and unforgettable experience!**
