

A3 – THE TRIP

➤ Exchange

A 'fish' needs to swim. For this reason, with this activity, the finished fishes will swim to another European country through the 'sea' (in our case, through the Twinspace Forum). With this activity, the fish will bring with them a message focused on the goal 16 from SDGs of the United Nations.

The **#Fishes** will have two missions. One of them is to share with another European student a message **to promote human rights, tolerance, and respect for migrants**. And the second mission is to **exchange an artistic intervention**.

➤ Coordination

For this exchange, we are going to distribute our class to one coordinator each 4 - 5 students. This is a good way for organized better space, the time and the effectivity. With this organization, students learn how to work in teams.

Students will send to the coordinator the message that they want to publish, and the coordinator will publish it on the forum. Each student will link with one creation and they will have a specific forum page for talking about their projects.

1. See your 'fish' assigned and write your opinion in the forum
